J.L. and "Mac" sometimes worked overtime. I worked only the regular hours being paid a weekly wage which was comporatively good for those times and my lack of experience. I received four or five dollars a week for working after school hours to six o clock and on Saturday all day, and nine dollars a week for full weeks after finishing school. A two or three follar a week raise was offered to me in the fall of 1925 for me to stay on at printing, but, I had made up my mind to enter a branch of the Royal Bank of Canada, starting salary of \$500. The bank salary ingred out about the same per hour as for the printing job. This laid out from the water's edge, partie on level of that name. It was settled by Loyalists from New York in 1783, the most of whom went early to farms, or, moving to older countries, left the whole

free trade with the U.S.A., especially with the New England States. The question was then debated by some Digby High School students one of which was a J.J.'s' daughter. Florence (now Mes. Melvin O. Some days after the debate a man from some part of Nova Scotia came to the printing shop looking for Florence, one of the successful debaters; I had the impression that his man was interested politically but, maybe I was wrong.

Well. I felt that I had learned considerable from my short experience at "The Wallis Job Print" I was learning to do beginner jobs, receiving some learning to do beginner jobs, receiving some learning eabout things like embossing, stapling, perforating, counting, cutting and trimming paper slock, mixing inks for certain desired colors, and so forth, but, the only experience I had at setting type was just enough to make a "pi", the printers name for a confused mess.

We publish in this assue the able and interesting article on "Virtue" by Lady Cook, not Tonnessee Claffin, that gifted American lady so well known to the reading public as the champion of woman's claims to the privileges and immunities enjoyed by the starre see. As the letter, which is direct from Lady Cook, reached the COUSERS hearly a week ago, we handed the manuscript to a Certyman well known in the county, with the sequest that he would favor us with a reply. This he has been good enough to do, and his letter also appears. The reader will find food for thought in both contributions.

As some of the members were unseated and diqualified for hinting on the hustings and at public meetings that their return would mean the improvement of public works in the respective constituencies, it will be seen that rather extreme and enusual interpretations of the law were arrived at

For I love an houset, upright man,
Where frankers there to dwell.
Which has note for its decirt.
No hallow words can left,
But in those throbbings plain are seen
This import of the mind,
Whose gould breathing utter nought
but accents true and kind.

I scorn that one whose empty acts and honied words of art Betray the feelings of the soul With perfide's keen dart;

Contempt is but a gentle word

A feeling far too mild

For one who confidence For one who confidence betrays

And guilt has sore begulied;
That hate which hellish fiends e
When in dark tormeuts tossed

Then give into one with heart as free And generous as the air, Whose ready hand and greeting kind live proof that trust is there, whose smiling countesance well she share to say a special support as saints whose Through Heaven's vaults resound.
