A Letter From Capt. Morton.

To the Editor of the Courier:
DEAR SIR.—In reply to Mr. Churchill's letter which appeared in "Your issue," I beg to say, it seems to be flapping his wings at a great rate, and also trying to crow. I wish to say right here that this is the first time he has ever had in opposing to me. I have had the pleasure of his acquaintance. Every time he has been out of the country, he has been out of the country. I have known of him for some time. I have known of him for some time. I have known of him for some time.

Mr. Churchill to crack, and as to crawling, I will not say that I have not seen him doing that, but I will not say that I have not seen him doing that. I will not say that I have not seen him doing that. I will not say that I have not seen him doing that. I will not say that I have not seen him doing that.

Mr. Churchill to crack, and as to crawling, I will not say that I have not seen him doing that, but I will not say that I have not seen him doing that. THE DIGBY WEEKLY COURIER.

Established 1874.
MATT MCCORMICK, Publisher.
G. D. HARRIS, Editor and Manager.
Subscription Terms: \$1.00 per annum in advance. Single copies 5 cents. Advertisements: 10 cents per line per week. Special rates for large advertisements. The paper is published every Friday except on public holidays. The office is located at the corner of Main and Water streets, Digby, N. S.

Digby, May 13, 1904.

The Yarmouth Times contains the following editorial: "A case of lobsters was accidentally opened on the wharf here on Saturday and when the officials were endeavoring to close it up they discovered three large seed lobsters among the lot. They were of course thrown back into the water, and the case confiscated. It was estimated that the three lobsters had a total value of \$2000 and the discovery may be regarded as a fortunate one for the lobster fishing industry. It seems almost incredible that a business man alive to his own interests, would be guilty of shipping such lobsters. It is a clear case of killing the goose that lays the golden eggs, and the too longy golden eggs of Nova Scotia's lobster industry have been killed, but that is no reason why a wholesale effort at depletion should be tolerated. The question is an important one."

ACCIDENT ON D. A. R. OF A LOCAL NATURE.

The Yarmouth Accommodation of the Track.
FIVE CARS LEFT THE STATION, 5:00 P.M. OF LUNTER STREET ON THE MAIN LINK AND THE TRACK DIVERTED FOR NEARLY HALF A MILE.

(Special to the Courier.)
YARMOUTH, May 13.—One of the worst railway wrecks in the history of the D. A. R. occurred near Yarmouth, yesterday afternoon, caused by a broken wheel on the Yarmouth accommodation, from Annapolis, in charge of Conductor George Williams and Driver "Spurge" Ritchie.

No fault can be attached to any of the train hands.
This train is generally known as the Annapolis and Yarmouth freight and is a mixed one, consisting of box cars, freight cars, a baggage car and a passenger car. Fortunately no one was injured.

Fifty thousand feet of lumber loaded on flat cars was strewn along the main line and it is reported that the track is twisted for nearly half a mile. A train was immediately sent from Yarmouth to bring in the passengers and it also returned for the mails, passengers and baggage, transferred from the Halifax express.

In the meantime trains were leaving Digby, Annapolis and Kentville with a large number of men and material to repair the damage.
The men have worked hard all night in charge of Road Master Murphy, and it is thought that the track will be completed and the train running again by tomorrow.

The management of the D. A. R. deserves great credit for the promptness with which these accidents are dealt with. Their line, as repaired, and the regularity of their trains under the difficulties.

Left for the West.
A large number of Digby people were at the depot Monday afternoon to say goodbye to Messrs. Van Halbeek, Esq., Esq. and his family, who were leaving for the west where they intend to remain some time. Mr. Van Halbeek's family reside in Brighton.

Mr. Van Halbeek is a well known resident of Digby and his family have the heartfelt sympathy of the community. Yarmouth and Annapolis papers please copy.

The funeral was held Sunday afternoon, the services being conducted by Rev. F. Langille, pastor of the Baptist church in Rosedale.

Observance of Arbor Day at Digby.
Last Friday showed that Arbor Day, although not observed for several years, was not forgotten.

The school lessons of the morning were devoted to the advantages of Arbor Day. The afternoon was given to work on the school grounds.

Although the announcement of the day had the effect of reducing the number of pupils, the day was a success.

The Josephine's Quick Work.
Mr. W. A. Chute's rector, Josephine, commanded by Capt. David Robinson, will continue to hold a regular service in the church on Sunday.

The same thing twice running, in the COURIER, but this week I shall make an exception to my rule. When I commenced to advertise "Baby's Own Cough Syrup," a friend of mine, who is in the patent medicine business, said I had tackled a hard proposition. I am now selling from two to five bottles a day of this preparation. I expect to do better with my "Baby's Own Laxative." It costs only 25 cents, for a three ounce bottle. Call in and have a talk about it.

DROWNING ACCIDENT.

Two Prominent Men Drowned in Lake Oromocto.

SAIL BOAT IN WHICH THEY WERE FISHING CAPSIZED—MR. STAVERT SWAM THREE-QUARTERS OF A MILE TO THE SHORE AND AFTER BRINGING UP FOR DROWNS WAS FOUND IN THE WATER.

ST. JOHN, MAY 22.—E. P. Stavert, Inspector of the Bank of New Brunswick here, who with John H. Thomson, of St. John, and John H. Thomson, of St. John, were fishing in a small sail boat in Lake Oromocto, on Sunday escaped death in a remarkable manner, and after a night and day in the woods in the Club-house caretaker's home on the Lake shore.

Telegraph reports brought the story to the City late tonight. The three named with Ald. MacRae, G. Westmore, and Mr. F. Jones, all of St. John, left here on Saturday for the Lake to fish until after the holiday tomorrow. On Sunday morning they were out in a small boat, but had been out at 3 p. m. They were there for the shore fishing.

SAIL BOAT WAS DISMANTLED. MacRae, Jones and the Club caretaker went out in the afternoon in a small boat leaving Merritt in camp. The wind came up suddenly. The second boat was dismantled and with difficulty reached the Lake shore opposite the Clubhouse.

The three men spent the night at the caretaker's. This morning they tramped round the Lake to the Clubhouse and then found the boat. Search was made for the first boat and it was found overturned with the mast broken twenty feet from the shore.

THE WAR

Since the Japanese swept the Russians from Kin chow on Friday, May 26, and successfully stormed Nan shan hill, which the Russians had fortified to prevent their further advance upon Port Arthur, additional troops have been landed, and the advance of General Okuma has been steady. It is said that about two miles are between the forces of General Okuma and General Stoessel, and that fierce engagements will be expected at any time. Japanese military reports that great explosions were heard at Port Arthur on Saturday, and that much smoke was seen to be rising. This is variously interpreted, but has been caused by the Japanese passing over mine fields on the landward side, to renewed attempts of the Russians to remove all obstructions in the way of their advance, and half a dozen other things, but they are all guesses. On Monday a week ago, it was announced that General Kuroki had been ordered to move to assist Port Arthur, and the rumor still persists in the fact that it would be a suicidal thing to do. It is believed that the movement of Russian troops south for this purpose under General Stalenberg has been, and that it was insisted upon by the Chief military advisers at St. Petersburg. For the past week the fighting about Kin chow has been more or less continuous, the advantage being generally with the Japanese. The Japanese, by General Kuroki, won a few days ago between Cossacks and Japanese, in which the Cossacks retired to the Japanese, further north. The commander of Russian troops at Kin chow is reported to be General Kuroki, who has been appointed commander in chief of the Chinese-Japanese war.

THE DIGBY WEEKLY COURIER.

Digby, June 17, 1904.

—Brazil appears to have caught the naval development fever, judging from the fact that a bill has been presented to the Brazilian Congress providing for the construction of twenty-eight warships. Three of these are to be battleships and three armored cruisers. Should this building programme be carried into effect, Brazil will have so far as the number of ships is concerned, naval preponderance in South America. Brazil's present navy, without reckoning, consists of seven vessels, of which four may be put down as second class battleships, and two of these are twenty years old. The Argentine navy is stronger, and besides eight or ten small battleships or armored cruisers, includes a number of very swift ships having only one deck protected. The Argentine fleet is being built up in anticipation of trouble with Chile. The latter, too, started a large building programme, but abandoned it on the anticlimax of the Chilean revolution. Argentina, Chile has sold two battleships on the way to England, and Argentina found a customer in Japan for a submarine. Argentina's navy is the only one of South America's navy that has manifested any marked efficiency, but the country cannot have much sympathy with it, as it has not the get her fleet modernized than she puts the best of her vessels on the bargain counter, an excellent way for dampening the spirit of any service. The genius of the South American nations is not maritime. Their navies are without the informing spirit that makes navies. In this respect they do not differ materially from the career Latin stock. Latin people are brave at sea, but they are not adept at sea. They are brave men of their true desire. Napoleon once told his brother Joseph that when the French fleet in France was to be found it would not be on the sea, and the advent has justified his prediction.

GREATEST ON GLOBE

Clergyman so describes Nova Scotia
before a New York

audience.

ITS PEOPLE ARE HEALTHY, PROSPEROUS
AND INTELLIGENT, BUT LACK
ENERGY AND GREATER INTELLI-
GENT DEVELOPMENT OF THE DUTY
—EXTENSIVE NATIONAL RESERVE

What New Yorkers are public told about Nova Scotia may be of interest to Nova Scotians. Hence the notes of a lecture of the Rev. H. R. Rose, of Newark, N. J., before a large Brooklyn Institute audience last week. The subject of the lecture was "Nova Scotia and the Land of Evangeline," and it was abundantly illustrated by excellent lantern photographs and colored pictures. N.

Scotia, while geographically a peninsula, is really an island, or two islands. Its people are healthy, prosperous and intelligent, but lack the energy, enterprise and greater intellectual development of the Dutch, who, possessed of such a country, would soon make of it one of the greatest on the globe. It has such extensive and various natural resources that if cut off from the rest of the world it could

still support itself in comfort and plenty. Its orchards produce the finest apples grown. It has ample forests. It is rich in farming and grazing lands. It has important fisheries and an important and prosperous shipbuilding industry. The climate is delightful in the summer and not too cold in the winter. St. John, N. B., the gateway to Nova Scotia, by rail from New York, founded by the Loyalists from the United States in 1783.

United States in 1783. It is situated on the Bay of Fundy at the mouth of the St. John River, a noble stream 450 miles long and in some places more than a mile wide. At low tide the mouth of the river has a fall more than 20 feet, but at flood the river is level with the bay and accessible to ships. On a clear day opposite Nova Scotia, 45 miles away, may be easily descried. Many people prefer to enter the Bluenose channel

by the steamer Prince Rupert, a swift boat, which runs between John and Digby. Lantern views are shown of ships of all kinds at anchor in bay or river, and the same craft little later stranded in the mud, some helpless sea monsters.

The country of Evangeline was visited, and photos shown of points of interest in the Grand Pre country. Money, in the island of Cape Breton,

place of considerable importance, has an excellent land-locked harbor. Louisbourg, on the eastern coast, is situated on the 60th parallel of longitude, and has a deep harbor right to the wharves, which are but a few miles from the ocean.

Halifax is "like a bit of old London broken off." Its graveyard is one of the finest in the world—it is cut out of the solid rock, and is

enough to admit the largest vessel can be filled in three quarters of an hour, and emptied in 3 to 4 hours. The battleship "Indiana" was docked there a few years ago at a cost of \$600,000. A view was given of the new west-arm on a summer day crowded with people on all sorts of pleasure boats. Henry Ward Beecher crossed the public gardens at Hales about the finest he had ever seen. Loughborough, an old target on the

er coast, was settled by German whose thrifty habits have been inherited by their descendants. The Lüburg fishermen build their schooners and use them till they come old and unseaworthy, when sell them to Newfoundlanders. Gloucestermen and build new ones for their own use. The lecturer left audience at Yarmouth, on the coast opposite Boston, with which

A warm panegyric on the people of the country was followed by a fish story as veracious as most fish stories. The New Yorker had about landed a trout, which however got off the line in time. In the confusion the sportsman dropped his watch into the stream and it was lost. Several days afterwards, fishing in the same spot he caught the same fish. On opening

it he discovered his watch, a WW
bury, still going. In the process
breathing the fish had kept the
wound up all the time.
