J.L. and "Mac" sometimes worked overtime. I worked only the regular hours being paid a weekly wage which was comporatively good for those times and my lack of experience. I received four or five dollars a week for working after school hours to six o clock and on Saturday all day, and nine dollars a week for full weeks after finishing school. A two or three follar a week raise was offered to me in the fall of 1925 for me to stay on at printing, but, I had made up my mind to enter a branch of the Royal Bank of Canada, starting salary of \$500. It was settled by Loyalists from New York in 1783, the most of whom went early to farms, or, moving to older countries, left the whole

Some days after the debate a man from some part of Nova Scotia came to the printing shop looking for Florence, one of the successful debaters; I had the impression that his man was interested politically but, maybe I was wrong.

I felt that I had learned considerable from my short experience at "The Wallis Job Print" I was learning to do beginner jobs, receiving some learning to do beginner jobs, receiving some learning eabout things like embossing, stapling, perforating, counting, cutting and trimming paper slock, mixing inks for certain desired colors, and so forth, but, the only experience I had at setting type was just enough to make a "pi", the printers name for a confused mess.

Because it is Recommended by the Best Grocers.

You will generally find Red Rose Tea in a store ich deals in standard brands of high class goods. These are the merchants who do not look for goods which give them the largest profit, because it pays them best to sell goods which are the most reliable and give their customers the greatest satisfaction.

T. H. ESTABROOKS, St. John, N.B.

N some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a lifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other as a trial and children onditions the gain is conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

Because no premiums, prizes or coupons are ever given clerk or consumer.

You don't get a premium with a bound of butter Why? Because the butter is worth what you pay for it. Just so with Red Rose Tea; the tea itself is worth the full price.

A pound of tea is not worth the price when a mium is thrown in free. A premium costs some g. You must pay for it.

If you size doubtful, use a pound of premium tea, then try a pound of Red Rose. You will soon discover why premiums cannot be given with Red Rose Tea; and if you like a rich, flavory, pure tea, you will use Red Rose in future.

# Red Rose Tea

Because the quality never varies.

Did you ever use a pound of good tea, and aftring more of the same brand, find it much inferior?

In Red Rose Fea this serious difficulty has been overcome by scientifically blending several teas together, so to always obtain uniform flavor and strength, and this

Without an ash-pan the ashes must be shovelled into a pail or some other receptable for removal—means dust in the eyes, ruined dothesy extra work; a dirty disagreeable job—the meanest part of furnace 'tending.

The Sunshine Furnace has an ash-pan which catches all the ashes, and slides in and out easily. Has two handles for carrying. No shovelling, sweeping or dirt.

This is only one of a dozen good features possessed by the Sunshine Furnace, none of which are found on any other furnace.

Because it is composed of both Indian and Ceylon teas:

Because it is composed of both indian and Ceyton teas.

The sea bush is indigenous to Assam in Northern India, and botanists are of the opinion that it is the parent species of all the cultivated varieties in India, Ceylon, China and elsewhere. In a wild state, it grows to a height of fifteen to itwenty feet, but the cultivated shrup is only three to four feet high.

Assam being the fractival home of the tea bush, it is not surprising that this and other districts in Northern India produce the 'cheest', most plungent teas grown in the world—toks that dominand higher prices than eyen the finest Ceyloris', but 'Ceylon' teas are very flavory and fragrant, and seem to be specially made to blend with the richer, more syrppy tea of India. When combined, the Ceylons give point, and liquancy to the liquor; the Indians, richness and scength.

The distinctive characteristic of Red Rose Toa, that the rich that of Mayor, is cleaned by blending these face Indians and Ceylons' and another very important feature of Red Rose Tea, vize, ris uniformity of flavor all the year round, is secured the same way, something not possible to obtain where Ceylon or Indian teas are used alone.

## REASON Nº 18

# Red Rose Tea

Because it is tested by skilled tea tasters.

The tasting can well be called one of the fine arts.

A man who can tasts several hundred cups of tea a day, and, by his keen senses, detect the slightest difference between them; and who, blindfolded, can tell where each and every tea was grown not only the country, but the particular district, and often the very plantation—such a man is the professional tea taster.

—such a man is the professional tea taster.

The head man in my tea room, Mr. W. R. Miles, is a master in his profession. He learned the business in London; Hog., and is a tea taster by right of birth, as both his Father and Grandfather were tea tasters. It came natural to him and he is recognized as one of the best judges of tea in America.

He and his assistants do nothing but taste the to and superintend the blending.

RED ROSE TEA is the result.

He saw it advertised in the daily papers and he thought he would try a few barrels. He didn't get many at first, not more than thirty barrels, because he wasn't quite sure how the Westville people might like it. However the flour came along and he tried it in his own house. Then he told a few friends that it was something first - class, and they also tried it. It seemed that nearly every person who got a barrel recommended it to someone else until before very long the enquiry became general and other Westville merchants had to get it for their customers, To-day the most popular flour in Westville is undoubtedly

## REASON Nº 20 Red Rose Tea

Red Rose Tea is composed of what are known in the trade as "high-growe," Ceylon and Indian teas. These teas are growns thigh altitudes on the mountain slopes, where the tea, bushes grow more slowly and are more carefully equity cateful that in the valleys, where the climate is warm and humid.

High-grown tea is not only a finer quality, but con-tains much more tha juice or extract than valley-grown

This can be easily proved by comparing a draw-of Red Rose with any other tea. By doing so you ing or sea sose with any other tea. By coing so you will find that a pound of Red Rose Tea will spend as far as 1½ to 1½ lbs. of other teas.

The saving is most apparent in the Blue Label and better grades—buy a pound and make the test.

### Weymouth Bridge.

FRIDAY, JUNE 23, 1905.

According to promise I am about to give you a little of the Weymouth news.

How delightful this month of June is. One feels it is good to be alive and cap-

able of enjoying its beauty.

I should like to take you through the country in my dear little village cart.
