J.L. and "Mac" sometimes worked overtime. I worked only the regular hours being paid a weekly wage which was comporatively good for those times and my lack of experience. I received four or five dollars a week for working after school hours to six o clock and on Saturday all day, and nine dollars a week for full weeks after finishing school. A two or three follar a week raise was offered to me in the fall of 1925 for me to stay on at printing, but, I had made up my mind to enter a branch of the Royal Bank of Canada, starting salary of \$500. The bank salary ingred out about the same per hour as for the printing job. The town plot is thus described.

The Trees Plot is streated at the east of the township just within the entrance to An-rapellis liasts, and beenly miles from Annapellis Town, and ex-mittee across tax-d from the lessel of St. Mary's day. This laid out from the water's edge, partie on level of that name. It was settled by Loyalists from New York in 1783, the most of whom went early to farms, or, moving to older countries, left the whole

free trade with the U.S.A., especially with the New England States. The question was then debated by some Digby High School students one of which was a J.J.'s' daughter. Florence (now Mes. Melvin O. Tibert, Freeport, Digby Co.) Some days after the debate a man from some part of Nova Scotia came to the printing shop looking for Florence, one of the successful debaters; I had the impression that his man was interested politically but, maybe I was wrong.

Well. I felt that I had learned considerable from my short experience at "The Wallis Job Print" I was learning to do beginner jobs, receiving some learning to do beginner jobs, receiving some learning eabout things like embossing, stapling, perforating, counting, cutting and trimming paper slock, mixing inks for certain desired colors, and so forth, but, the only experience I had at setting type was just enough to make a "pi", the printers name for a confused mess.

Two Flours in One

Beaver Plour is the best "pastry flour," just as it is the best bread flour. Because it is a blend of the two flours that are best for bread and best for pastry.

Beaver Flour contains Manitoba wheat, which is rich in gluten, and makes bread that is both tasty and nutritious. Beaver Flour also contains Ontario wheat, which is famous for the light, delicious Cake, Pies and Pastry it makes.

Beover Flour is always blended in just the exact proportions, so that it is always the same and always gives the same results when you use it.

Work on the vessels hauled up on Capt. J. H. Benson's Marine Railway slip, is progressing rapidly. Barque Affizona, 1100 tons, owned by Mr. Geo. Lewis, of Truro, is on the blocks for extensive repairs and will be completed shortly. Schooner Catherine, owned by Capt. James Cosman, is also undergoing repairs. The next to occupy the slip will be the S. S. Westport, with others to follow in the near future. Capt. Benson is certainly a hustler. He gives ampleyment to about forty men who might otherwise be idle, as aside from the fish ing, and lobster catching, we have no other industry and the Marine Railway is therefore of great benefit to Meteghan,

How To Save Work In The Home

dost of the dust in the modern home comes from the floor. It needn't, if you would use Floorglaze right. And dust in Tuerely a bother for the house-wife and the maids. It's a danger.

Dust spells d-i-s-e-a-s-e. The germs of all infections dwell, mainly, in floor-dust. Floorglaze reduces floor-dust to a minimum.

When you coat a floor with any of the ten shades of Floorglaze you have a floor that is creviceless (can' harbor germs), washable (use an anti-septic in the mop-water), and nearly dust-proof.

You will get weary watching for it t outdoor wear, even—verandas, porch ateps, etc. And a gallon covers 500 square feet. Cheap!

Two Flours in One

Beover Flour is the best "pastry flour," just as it is the best bread flour. Because it is a blend of the two flours that are best for bread and best for pastry.

Beaver Flour contains Manitoba wheat, which is rich in gluten, and makes bread that is both tasty and nutritious. Beaver Flour also contains Ontario wheat, which is famous for the light, delicious Cake, Pies and Pastry it makes.

Beaver Flour is always blended in just the exact proportions, so that it is always the same and always gives the same results when you use it.

but it is rich in carbohydrates-which give to flour the qualities of lightness and whiteness.

Beaver Flour

is both a Manitoba and an Ontario wheat flour.

Just as much Manitoba Spring Wheat are used in blending eaver Flour, so that each will supply what the other lacks.

That is why Beaver Flour makes whiter, lighter, more wholesome Bread and Biscuits than Manitoba flour-and makes lighter, tastier Cakes, Pies and Pastry than any "pastry" flour.
