J.L. and "Mac" sometimes worked overtime. I worked only the regular hours being paid a weekly wage which was comporatively good for those times and my lack of experience. I received four or five dollars a week for working after school hours to six o clock and on Saturday all day, and nine dollars a week for full weeks after finishing school. A two or three follar a week raise was offered to me in the fall of 1925 for me to stay on at printing, but, I had made up my mind to enter a branch of the Royal Bank of Canada, starting salary of \$500. The bank salary ingred out about the same per hour as for the printing job. Standing streams is said to make the ocean on the shore and looking out over the expanse of water, the ocean sheems a fixed and eternal fact, but the sea had a beginning and will have been absorbed in the earth's crust, its surface will be a desert and all life will become extinct.

The age of the oceans has been estimated by a leading authority, Professor Frank Clarke, of the United States Geological Survey, at about 90,000,000 years. This, of course, is only approximation, but it is based on carefully studied scientific data.

#### A WOMAN'S INFLUENCE

INFLUENCE

So great is the mind of a sweet minded woman on those ground her that it is almost boundless. It is to her that we all go in seasons of sorrow and sickness for help and comfort; one soothing touch of her kindly hand works wonders upon the feverish child; a few words dropped from her lips in the sar of a sorrow-stricken eister will do much to raise the load of grief that is bowing its victim down to the chast, in anguish. The husband comes home word would be sooned to be on its mother's breast; and so one might go on with instance after instance of the influence that a sweet minded, woman has in the social life with which she is connect-ed. Hearty is an instantional power when compared with hers.

# The Why? of Another Victory Loan

WHEN, on the morning of November 11th, 1918, the guns were hushed and glad tidings flashed across the world, there followed with the Nation's Prayer of Thanksgiving, one yearning query, which found echo in the faster beating hearts of wives, mothers, fathers, brothers, sisters and sweethearts. That query was, "How soon will our boy be home?" And, from France and Flanders, query was, How soon will our boy be nome? And, from France and Francers, from Italy and Egypt, from Palestine and from far-off Siberia, there came an answering echo, "How soon, how soon, may we go home?"

CANADA caught the spirit of these longings, and at once resolved to satisfy them. It was an appalling task. Shipping was tragically scarce. The composition of the Army of Occupation had not then been settled. And other parts of the Empire as well as Canada were looking for the speedy return of their men.

THE problem was this. The half-million men that Canada had overseas had taken more than four years to transport to the field of battle. To bring them home in a few months was a gigantic undertaking—one to tax all Canada's ingenuity and resources. Canada solved the problem, but it meant crowding into a few short months, an expense for demobilization which it was impossible to foresee.

THEN, too, besides the sentimental aspect of the necessity for bringing the men home quickly the economic side could not be overlooked. That was, to transform efficiently and speedily the nation's army of fighters into a national army of

Need

The answer to the question "Why does Canada need another Victory Loan?" divides itself into two parts. Divides does Canada need another Victory
Itself in (a) To finish paying the expenses
Two Parts (the dimbilization, and the obligations we still owe to our soldiers.

(b) To provide national working capital.

The obligations to soldiers in-clude: **Obligations** 

Obligations The obligations to soldiers include: Chude: Chude the Chude that already incurred cost of bringing home troops from overseas. The payment of all soldiers still undemobilized. This includes more than 20,000 sick and wounded who are still in hespital, and who of course remain on the Army payroll till discharged. The upkeep of hospitals, and their medical and nursing staffs, until the need for them is ended.

These three items alone will use up at least \$200,000,000 of the Victory Loan 1919.

Gratuities There is also the gratuity which has been authorized, and has been has been authorized, and has been authorized, and has been and is being paid to assist soldiers to tide over the period between discharge and their re-adjustment to civil life. For this purpose alone, \$51,000,000 must be provided out of the Victory Loan 1919, in addition to the \$59,000,000 already paid out of the proceeds of the Victory Loan 1918.

Settlement

Act, be loaned money by Canada with which to purchase land, stock and implements. The money so advanced will be paid back; meantime each loan is secured by a first mortgage. Up ty August 18th, 29,495 soldiers had applied for land under the terms of this Act; and 22,281 applications had been investigated, and the qualifications of the applicant approved. For this purpose Canada this year requires \$24,000,000. Furthermore, soldiers who desire Land

These national expenditures are war expenses. They will be accepted readily by every citizen who gives thought to the task which Canada faced following the Armistice, and to the success with which she has met it.

National Capital

Canada needs national working capital, so that she may be able to sell on credit to Great Britain and our Allies the products of our farms, forests, fisheries,

mines and factories.

You may ask "Why sell to them if they can't pay cash?"
The answer is, "Their orders are absolutely essential
to the continuance of our agricultural and industrial

The magnitude of these orders and the amount of employment thus created, will depend upon the success

The "Why" Farmers and manufacturers (and of Credit Loans that includes the workers on these orders) must be paid eash for the products. Therefore, Canada must borrow money from her citizens to give credit, temporarily, to Great Britain and our Allies. Actually, no money will pass out of Canada. If Canada does not give credit, other countries will; and they will get the trade, and have the employment that should be ours, to distribute amongst their workers. And remember, we absolutely need these orders to maintain employment. If we don't mance them business will feel the depression, employment will not be as

For Transportation Money must also be available to carry on the nation's shipbuilding programme, and other transportation development work.
For loans to Provincial Housing Commissions who are building moderate priced houses.

These, then, are some of the things for which Canada needs national working capital. She is in the position of a great trading company, and her citizens who buy Victory Bonds are the shareholders.

Those who give thought to our outstanding obligations to soldiers, and to our need for national working capital, cannot fail to be impressed with the absolute necessity for the

Gala Day When the "Procession of the Holy Carpet" Leaves Cairo for City of Mecca.

City of Mecca.

Always picturesque, Cairo is never more fascinating than during the "Procession of the Holy Carpet." In the bazaars we watch the barefooted workmen embroidering, holding the-cloth in their toes, which spear to be prehensile, or watch them go to the nearest mosque to habe-dive times a day. As many times a day, also from the minarets of mosques the moreaction are reminding the natives of the approaching festival, and that "God is great, there is no God but God, and Mahammed is his propher. Come to. Frayer."

Rowling dervishes are dancing in

Monammen is his prophet. Come to Frayet."
Howling dervishes are dancing in the mosque near the Square of Sutten Hasan, while devout Moslems are engaged in eventide prayer on their housetops. Water carriers are on the way to the yellow Nile for water, or are bearing wine in their goatskins the same as in Biblical times, while aged men in the mosques are appareded exactly as in Abraham's day.

The streets are filled with soldiers, while thousands of civilians attend the ceremonial held in the jaccred prophetic indocure in the great square near

### GREAT EVENT FOR MOSLEMS LINGERED TOO LONG

Great Men Who Outlived Their Hours of Fame.

Between the idiot and the man of Between the idiot and the man of sense, the lunatic and the man of genlus, there are degrees—streaks—of idiocy and lunary. How many expectant politicians elected to congress have entered Washington all hope, eager to dare and to, and have come away broken in health, fame and fortune, happy to get back home—sometimes unable to get away, to linger on in obscurity and poverty to a squalid and wretched old age.

I have lived long chough to have known many such! Senators who have filled the galleries when they rose to speak, house heroes living while they could on borrowed money, then hanging about the hotels begging for money to buy a drink!

There was a famous statesona and cortor who came to this at last, of

Three was a famous statesman and orator who came to this at last, of whom the typical and characteristic story was told that the holder of a cidim against the government, who dared not lapproach so great a mid with so migch as the influention of a bribe, undertook by argument to inderest him in the merit of the case.

The great man listened and replied: "I have indiced your scattering your means around here pretty freely, but you havent said 'turkey' to me." Sfrprised, but glad and unabasted, the claiming said, "I was coming to that," produced a thousand-dollar bank roll and entered into an understanding what was to be done next day, when

roll and entered into an understanding what was to be done next day, when the bill was due on the calendar. The great man took the moley repaired to a gambling house, and an extraordinary ran for lack, won heavily, and playing all night, forgetting about his engagement, went to bed at day, light, not appearing in the house at all. The bill was called, and there being nobody to represent it, under the rule it weat over and to the bottom of the calendar, killing it for that session of course.

The day after the claimant met his recalcitrain attorney on the avenue face and face and took him to task for his delinquency.

THE JEWELERS' HARVEST.

With the American national debt climbing toward the thirty billion mark, and the cost of the necessaries of life from 80 per cent, to 100 per cent, bigher than they were four years ago, seven millions of dollar's worth of diamonds are entering the cauntry each month, in addition to the other millions worth that are smuggled. The editor of the Jeweler's Circular, official organ of the National Jeweler's Board of Trade, says that it has been one continuous, Christmas season all summer. In the past there have been two main seasons of sale, Christmas and Easter, but there has been no let up this year. Men, women and children in all conditions of life are putting imponey in precious stones as never before. The editor believes that many of them are doing this for; investment there have been no let up this year. Hen, women and thighten in all conditions of life are putting imponey in precious stones as never before. The editor believes that many of them are doing this for; investment that they are making a wis investment. The fact that diamonds are always easily pawned and that money can be raised upon them more readily than upon almost any other property is a reason why certain classes of people like to invest in diamonds.

THE MOTOR INDUSTRY.

Automobiles are being sold fair and advance of the factory output, and many people, hundreds if not thousands of them, who cannot find the precise pitch of luxury and extraved made car are having special bodies built. The motor market, of course, is not a true index of the rise of luxury. Perhaps the great majority of people who drive cars cam make money out of them by saving time or labor, in which case the purchase of a car is to be regarded as an economy, not extravagance. The hotels, despite the fact that rates have gone up, summer hotels renting rooms at from \$7 to \$25 at day have had a amazingly profitable summer It is said that in the United States not fewer than 350 new hotels have been planned for construction before next summer. # The Navy League of Canada Its Vital Work for Canada

THE Navy League of Canada fosters the splendid spirit that made the British the greatest of maritime nations. It organizes loyal Canadians so that practical work may be accomplished for the development of Canada's direct interests at sea.

The human side of Canada's Mercantile Marine is the League's especial interest—training Canadian boys to become the sturdy type of British manhood that won its laurels again and again in the great war—relieving distress among victims of the submarine warfare—and giving the sailor ashore an alternative place for rest and recreation to the places of doubtful entertainment that abound in port.

### Why the \$500,000 is needed

On Nelson Day, October 21st, starts a 3-day campaign throughout the Dominion to raise, \$500,000 necessary to finance the coming year's work of the Navy League of Canada-Help the work by giving liberally. As a nation whose expanding trade will depend on exports, we must educate our boys to the highest type of seamanship so that they will be equipped to man our ships to carry our exports to foreign markets.

You will do your part in this work by con-tributing liberally to the support of the Boy's Navy Brigades, the organizations by which the Navy League trains boys for our mer-

Every dollar subscribed will be used to further the work of the Navy League in Canada—the work in which you are personally interested as a patriotic citizen. Help by giving.

BEFORE buying Victory Bonds again you may want to know how Canada used the money you loaned her last

Canada borrowed the money to carry on the war and to pro-yide credits for Great Britain and our Allies.

CONSIDERABLY more than one-half of the Victory Loan 1918 was spent on our soldiers. \$312,900,000, for paying them, feeding them, bringing them home, separation allowances to their dependents, maintenance of medical services and vocational training schools.

\$59,000,000 of the Victory Loan 1918 was paid on account of authorized Soldiers' gratuities.

9.000,000 was spent at Halifax for relief and reconstruction after the disaster.

Other disbursements were not strictly speaking, expenditures, but National Re-investments.

To Great Britain for example:

\$173,500,000 was loaned for the purchase of our wheat and cereals.

\$9,000,000 for our fish.

\$30,000,000 for other Foodstuffs.

\$2,900,000 for Canadian built ships.

\$5,500,000 to pay other British obligations in Canada.

Making in all \$220,900,000 advanced to Great Britain.

To our Allies, we loaned \$8,200,000 for the purchase of Canadian foodstuffs, raw material and manufactured

These credits were absolutely necessary to secure the orders for Canada because cash purchases were impossible.

They have had the effect of tremendously helping agricul-tural and industrial workers to tide over the depression that would have followed the Armistice, had we not made these credit loans...

As far as money is concerned, 1919 has been, and is stilljust as much a war year as 1918. Our main expenditures for war cannot be completed until well on into 1920. Thus another Victory Loan is necessary—Get ready to buy,

# Every Forest Fire is a Bolshevist - Block Him!

Burning down a forest is the same sort of business as-burning down the Town Hall, or confiscating a workman's savings bank.

It robs the timber savings-bank of our country without a hope of restitution of the stolen goods.

It thieves from the public purse, because ninety per cent-of all Canadian timber lands are public owned.

It destroys employment, because the thousands of busy-saw mills, pulp and paper mills, etc. are as helpless without logs as a steam engine without steam.

Canada's chief hope of national success-is by cashing in on fertile lands and growing forests.

#### FIRE DEPARTMENT OF ROME, YEAR 72 B. C.

Organized by Julius Caesar Had Force of 600 Men.

(Youth a Companion.)
Many of the so called "modern improvements" of civilization, which so largely contribute to the comfort of living, are by no means so recent in origin as we are disposed to

of living are by no means so recent in origin as we are disposed to imagine.

An eminent archaeologist has recently declared, for example, that Nero's palace in Rome has three elevators. It is true that those elevators must have been hoisting machines of very primitive pattern—operated presumably by man power, with the help of rope and counter weight and it is more than doubtful that they were ever used to carry human freight. Few palaces or other buildings in ancient Rome were more than two stories in height, and passenger "lifts" were for that reason not needed.

We are accustomed to think of running were in hones as a modern luxury. New York city did not have it until 1776, when a reservois, into which water was raised by pumping it from wells dug for the purpose. But that was a very primitive arrangement, compared with the system of ancient Rome, by which water was brought from great distances in aqueducts that were marvels of engineering and that emptied through, lead pipes into thousands of tanks of hexa stone.

Erected at intervals along the

and thindent makes the prostone.

Frected at intervals along the
streets of Pompeli were pillairs of
masonry, up which ran lead pipes,
and on top of each pillar was a tank,
from which water was distributed
by pipes to the houses. All dwellings, except those of the very poor,
were thus supplied, and some had
nearly a score of faucets, controlled
by stopcocks that are much like
those that are in use to day.

At many street corners there were
fountains with stone basins, the
edges of which even now show
depressions worn by the hands of
the people who leaned over to drink.
Those fountains were fed by the
city water, which was brought by
an aqueduct from a distant place
so elevated that the "head" was
very powerful. That kind of engineering was highly developed in
those times. When Julius Caesar
first visited Alexandria in Egypt he
found there so complete an underground water supply system that
the 'city seemed' "hollow underground water supply system that the city seemed "hollow under

the city seemed "hollow under-meath."

In the year 72 B. C., Julius Caesar organized the fire depart-ment of Rome. It had a force of 600 mer. At that time a primitive fire engine had already come into use; it was a pair of pumps worked by a beam and the two streams unded in a common discharge pipe and passed out through a nozzle that could be turned in any direction. "Siphons"—emergency fire extinguishers—were commonly kept in houses. Frequent mention is made of them in ancient literature, but we do not know what they were like.

#### **HOW LONG CAN** THEY DO IT

(Extract from the "wall street Journal.").

There is in Canada current opinion, that it costs the Government \$1.03 to get \$1 of gross revenue from the railroads which have been emancipated from the capitalistic class. I A deficit of \$50,000,000 in 1919 is the forecast. This straightway gives rise to conjecture as to what the true relation of cost and revenue would be if some courageous Administration reached down to the bottom of our own Government operation of the roads. Thanks in part to the peculiarities of the Canadian situation the private Graud Trunk and Canadian Pacific lawe contributed nobly to the Government's experiment in railroad operation. This and other causes have steady lifted the percentage of cost to gross revenue. Today it is 89 per cent for the Grand Trunk and 81 per cent for Canadian Pacific. The percentage thus actually discloses the shocking second of strunds are then the ten them.

Today it is 89 per cent for the Grand Trunk and 81 per cent for Canadian Pacific. The percentage thus actually discloses the shocking scandal of surplus, rather than the uplifting inspiration of deficit.

Monthly statements duly audited and certified show Canadian Pacific and Grand Trunk can still operate on their own motive power, the exact status of the Covernment roads is not so clearly revealed. Why it is not is a matter of conjecture, friendly, invidious or neutral as may be. Some irreconcilables want to know how they are to reach a conclusive audit of Canadian Northern, making a true capital investment basis for figures. Others say there is an operation deficit of more than three per cent. What if it be so that the more wheels turns round and the faster they go, the more money they lose. If it cost 3 cents net loss to take in a dollar, isn't the taxpayer there to pay it? And doesn't the paltry 3 cents go at once back into circulation? "An long as he has a dollar left to burn why shouldn't the taxpayer writhe and turn"?

A staunch supporter of a western co-operative grain: concern with a long and honorable record of losses used to refer to its "turnoyer as its "Turnunder," Happily free of the embarrassment of literary cult, he has given the Government's railroad auditors a book heading, accurate and novel. They should be satisfied and so should the taxpayer. For as a facetious inquirer for Government figures Says." If a tax payer is not to pay there taxes, what is he for." But how long can they do it?

#### **A DANGEROUS** POLICY

H. S. Arkell, Live Stock Commissioner, who has recently returned from a trip to Europe, where he has reviewed the live stock market situation, has expressed his views, regarding Canada's position, in the October number of The Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, eggs, etc.—for which they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian bacon, as compared with American, and demonstrates the effort of our packers to maintain their connection with old established clients in the face of short supplies. Since Demmark, within a year, will again be a factor on the bacon market our on the bacon market our on the bacon market our on the supply as must command recognition by its volume and quality. Short log production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

# Everyone Who Bought Canada's Victory Bonds **Made Money**

VERY one of the million and a half subscribers to Canada's Victory Bonds knows that he can sell them today for more than he paid for them.

Every one who bought Canada's Victory Bonds has received 5½ per cent. interest per annum—paid twice a year.

Over half a million Canadians who bought Canada's Victory Bonds on the instalment plan saved money that they would not otherwise have saved.

The guarantee back of Canada's Victory Bonds is the same as the guarantee back of a One Dollar or a Two Dollar bill. There is this difference, however, that you get interest on the Victory Bonds and you don't on the One or Two Dollar bill.

Canada's Victory Bonds will always be accepted as security for a loan.

Banks are ready to loan money on Canada's Victory,

Canada's Victory Bonds may be turned into cash at any time.

There is no other way in which you can invest your money with such absolute security—paying such a good rate of interest.

Canada will soon give her citizens an opportunity to buy Victory Bonds 1919. It will probably be the last chance to buy Canada's Victory Bonds on such favorable

Stephen also extended a hand.
"Sure!" be said. "Glad to see you again. Pearson. Havent met yon for an age. How are you?"
Pearson shook both the bands. He was embarrassed and hesitated in his

reply.

"It has been some time since we met," he said. "This is an unexpected pleasure. Ah, Mr. Dunn, good even-

ing."
"It is Mr. Pearson, the financial writer of the Planet, Malcolm," said Caroline. "You used to know him, I think."
"Don't remember, I'm sure. Yes, I do. Met you at the University club. didn't I?"
"Yes. I was formerly a member."
"And let me present you to Mrs. Corcoran Dunn," went on the girl. "Mr. Pearson used to know father well."
Mrs. Dunn inspected the visitor through her lorgnette and condescended to admit that she was "delighted."
"I'm very glad you culled," continued Caroline. "We were just in time, weren't we? Do sit down."
"I'm a fraid I can't wait, Miss Warren. I dropped in to see your uncle, at his invitation, and, as a matter of fact, I didn't know."

Farmers Buy Trucks Because

they save labor, save time, save money.

The Ford Truck is the most generalpurpose implement on the farm.

The farmer can get his breakfast at home, take his produce to market, and be home again for dinner.

He can command the highest prices for his vegetables and fruit because he gets them to market while the dew is still on them.

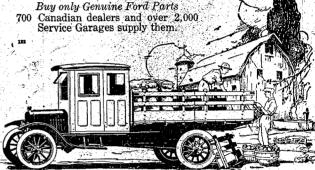

He can take his hogs, sheep and other stock to market, as well as haul roots, potatoes and apples from the field.

The Ford Truck brings the city to the farmer's door.

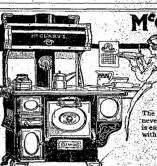

It solves the problem of the shortage of labor.

A saving in horses, a saving in men.

SURELY it is every woman's right to have a range like the Kootenay! a range that she can depend on—a range that is a real joy to work with—a range easy to keep clean—a range that "keeps the oven hot" with a small fire.

The cooking-top is burnished brighter than steel; it never needs blacklead. The oven wall of nickeled steel seeds blacklead the grates clean down the fire with a single swing of the lever. Soo this famous range.

#### ONE MORE EFFORT

Far beyond the expectation of the Empire and the world, Canada fought and strove and paid gallantly for five years. Indeed it may be doubted if any native Canadian witnessed the notable effort of the Dominion without amazement. The true spirit of the people was not understood until the guns beyon to speak in Belgium. It rose, month by month, to greater, and still greater heights. The double climax came in the autumn of 1918 when the Canadian Chrossman when the matter in the Mons, and when the nation subscribed \$610,000,000 for Victory Bonds. Far beyond the expectation of th

Mons, and when the nation subscribed \$610,000,000 for Victory Bonds.

In the war Canada found herself, 'The name 'Canadian' is respected the world over; not only in the nations alled with the British Emippe in the defence of liberty, but in Germany itself.

The fighting is over. The great task of dearticulating the organization built by four years of ardent effort is almost complete. The work of maintaining the Army until it is fully repartired, and fuffilling completely the national obligations to the soldiers has added much to Canadian War expenditure.

For that reason there is instant need of a new Victory. Loan 'The patriotic people whose ardor and energy brought Canada into the sunlight are asked to keep, the Dominion there by buying Bonds. for the belief that the success of this latest Victory Loan will be instant and overwhelming. But all citizens must have part in it. It is not a task to be half-done by the whole people, or wholly done by half the people. Let every citizen subscribe

#### LIFE LESSONS

Life is full of lessons for those whose minds are always open to learn. One is constantly coming across little incidents that set the thoughts vibrating with a new theme. A visitor from town or another neighborhood, a 'snatch of conversation overheard in a train, a smile in the street, in town, or at church on Sunday, a book in a shop window, the gleam of sunshine over the broad fields they all go to form the patchwork quilt of the mind. Life is full of inspiration for those who have eyes to see and ears to hear. To train the mind to perceive readily the flashes of interest in everyday life, and to be ever ready to register new impressions, is the duty of every man and woman who would shape their lives to a high ideal. To go through life dully, without comprehending the hidden beauty and joyousness and goodness is to waste life and he who wastes life is better dead. Life is full of lessons for those

"In one of the most distinguished and expensive hotels in New York city all the bedrooms are white, the furniture & harsh red. This is absolutely criminal, a torture to the visitors that should not be allowed, though the visitors do not realize their demoralizing surroundings. Another instance is one of the smartest clubs, up to date in every way. The dining room is a mess of garbage surrounded by bricks painted a sickly green; the walls are of vast and horrible whiteness, and the bedrooms are prepared with a pattern of irritating persistence that never, for one single instant, relieves the eye. Even when one is reading a book the kaleidoscopic effect penetrates the brain. "Life in New York is micessarily filled with turmoil, why ladd to the graing a copy of the Prince's autoriage that it does to your nervous system. Go to bed in a rroom that has quiet, warm, healthy color and find rest from latigue to the brain and eye."

#### Go to School? Why, Certainly!

Why, Certainly!

Twice in the last three weeks the Courier has heard prominent citizens of Digby, while in course ratio, throw doubts on the advisability of educating their sons. They claimed that at the present time the man of education was at a disadvantage in making a living, as thousands of men who cannot read write are making incomes four and five times in excess of college professors, ministers, lawyers and doctors (to say nothing of editors). Thousands of educated men are thinking along the same lines are thinking along the same lines are present and in, alsa, too many cases, their sons between twelve and treatment are swiner to be robbed of a control conditions.

False wages are present paid to unskilled labor would attact everyone and soon the supply would exceed the demand and except the demand and the professions would be neglected and their ranks thinned out, making their services more in demand. We do not think that any conditions can exist which will continue a falsely high wage to manual labor and a falsely low wage to professional manual labor and a falsely low wage to professi

conditions can exist which will continue a falsely high wage to manual labor and a falsely low wage to professional men.

The conditions which made it possible for unskilled labor to double, treble and quadruple wages were made possible by an aggregation of circumstances over which we had no control, and the work what had no control, and the work what had no control, and the work is still in the grip of these circumstances. Changes must come and the professional man and the manual worker will again assume normal relations. Civilization would cease to be if the scientists, the writers should be reduced to poverty—but nothing like this will happen. Therefore, keep your boys and girls and school and give them the best education you can afford.

### Keep Implements Under Cover.

If one travels through the coun-try at the present time, the haying and harvesting machinery on many farms may be seen standing in the field where last used. It may have been drawn out into the lane somemean where last tised. It may have been drawn out into the lane somewhere or may even be at the barn but not inside it. There seems to be a sort of reckless abandon regarding the use of machinery. When a mower or rake breaks down it soften drawn off to one side of the field and forsaken when it could be easily repaired and made to serve for a season or two longer. The prices of all kinds of farm implements have gone up and it is poor business to neglect the machinery by leaving it exposed to the weather. The wooden parts soon rot away and the metal parts rust out. It takes longer also to get a rusty implement into working order again.

Anticipating that many districts will buy far beyond their allotment, the organization decided that for each twenty-five per cent. excess of the quota one Prince of Wales' Crest be awarded. Thus the workers in a district doubling its quota will be the proud winners of four small crests for their Honour Flag. These crests will be sewn to the flag. The Prince's Crest— The Prince's Motto is "I Serve" Will You also Serve?

## Victory Loan 1919

The flag is made in two sizes, 4 feet 6 inches by 9 feet for small cities, towns and villages, and 7 feet by 13 feet 6 inches for cities of over 10,000 population.

Canada has been divided into canvassing districts by the Victory Loan Organization. Each city forms one district.—Other districts have been determined according to population.

Each of these canvassing districts has been allotted a certain amount in Victory Bonds to sell. To win the Prince's Flag, therefore, a district has to sell its allotment. That is the one and simple condition.

The has been thore than a year mow, "explained Mr. Cameron, "that I lost my appetite and my stomach began troubling me. For eight months, that is from the time my trouble first started until I got relief by taking Taulac, I saffered more than I can finit words to tell. My stomach was so upset that at times I could not even bear file sight of food. Many a time I have liad 'to get up and leave the table without eating anything on account of being mauscated. What little I did manage to eat at any time would sour and bloat me up so with gas that I would have to unforten my vest and let my belt out in order to get a good breath. And sometimes this gas would cause my learnt to palpitate so hard and fast that I could almost hear it and I would get, so dizzy that I would have to grab hold of something to keep from falling and lurting my self. I also had pains under my lieart that almost cut of my breath and was so hervous that the least noise would startte me. I could never get a good might's sleep and world and wornout that I felt absolutely unit for work.

"But my lucky day came around at last, when some of the boys, down at hes hispards, got to telling me how Tanlac had helped them and persuaded me to try it. So I did and the results have been nothing, less than remarkable. After using three bottes and that was sometime ago.—I was feeling us strong and well as I ever did and I mars till feeling that way. I picked up eight pounds while taking it and am still holding on to that increase. My appetite is so big that meal time comes too slow for me and I don't believe anyone in Vancouver has a better stomach than I have, I am never troubled any more with gas, paligitation of the heart or shortens, why I never wake a single time during the night and I always get up in the morning feeling fine and I-don't have that tired, no account feeling any more, Tanlachas certainly done me a world of good and I am ready at any time to recommend it."

There is no more stirring legend in all history than this, and there can be no doubt that the remembrance of the "brave days of old" has helped to make heroes of the men of later days and vastly aided in establishing Britain as "Queen of the Seas."

The German interned ships put into service of the United States during the war carried a total of \$931,619 troops to and from France. They took more than \$00,000 troops from American ports, or one-fourth the total delivered when the armsitice was signed, and brought back more than 400,000. The Leviathan alone carried a total of 17,500 men.

THE WINDING OF YARN OR WOOL. THE WINDING OF YARN OR WOOL.

Each male competitor is provided with a ball of wool, while the girls have loose skeins. The men stand in a line on one side of the room, the girls on the other. Slow waltz music is played. The girl at the top of the room and a man at the bottom start together. She, with the skein of wool stretched on one hand, unwinds with the other as she waltzes down the line of men alone, who endeavour, by not taking more than three paese, as she passes to catch the loose end. When this is successfully done, the the man waltzes with the girl, though he does not touch her, because he must wind the skein up as rapidly as possible. If no one is quick enough to catch the loose thread of wool the score for the girls is largely increased. Happiness follows the girl or boy who succeeds in throwing an apple alone succeeds in throwing an apple through a suspended horseboe. The lot test of the light of a single candle shows the expectant maid the face of her love reflected in the mirror. The favors at this party may be, for each of the boys a rabbit's foot mounted in silver, and for the girls a little cube of wedding cake with the inscription. "Put this cake beneath your head and you will dream of him you'll wed." The choice of an empty glass from three, the other two containing respectively water and milk, a points out a lonely backelorhood to the unfortunate man. The glass of water promises a beautiful maid for a wife, while the milk foretells a widow.

thread of wool the score for the girls is largely increased. The man with the ball of wool turns his back to the pretty line of waiting girls and throws the ball over his should-ter, no girl in order to catch it may take more than three paces. If caught the successful person begins waltzing as she unwinds it rapidly the man having to make it into a rough ball, while dancing in step of palmistry and Ghost Stories—with her. Prizes are offered for the best winding, and also for the most graceful dancing.

THE CABBAGE TEST.

Small cabbages are planted in the boxes, uproof a cabbage, and return to the judges. The first to pass a tape wins a prize, but there is divination connected with the sport. The cabbage with much earth clinging to the roots promises wealth on the part of the hide or groom; a scanty root declares the loved one will be mean, not generous, a tough stalk, or custoc, as the old term has it, forctells much hardcess of heart. Other prizes then are offered, while the race has a time limit.

THE APPLE SWINGING.
Put a long piece of wood uprigit in a large flower-pot of earth, and the top fasten apples, each by a substitute of the prices, the content of the term and the funder of the large was a time limit.

by Laura cates sixon.

On Hallowe'en Night hobgoblins and fairies are abroad ready to cast their spells upon you, perhaps carry you off to see the imps dancing about some new recruit, when you will surely die! Beware! Avoid the open road, and if you must fare forth, go through the side ways and the byways, for oh the open road the witches are galloping, some on brooms and some on coal black cats!

The jolliest place for a Hallowe'en party is in a large room with an open fire or a stove. Let it be a place where a little water spilled will not dampen the pleasure of the

rening.

Across the floor is drawn with Across the floor is drawn with chalk a path which is supposed to be the open road. Strips of canvas might be used for this path if the floor can not be marked. A large cardboard on which is witten the following verse is posted in a very conspicuous place in the room: Hallowe'en will come, will come; Wichcarft will be set Asgüng; Fairtes will be at full speed, Running in every pass—for the part of the control of the children, or a forfeit pay!

only after the person has performed some amusing stunt required by the hostess or whoever is appointed as forfeit-holder.

The fruits of the harvest may be used for decorating 'the room for this frolic although this's is not a harvest festival, but a rejoicing for the safe return of the herds and herdsmen from their Summer quarters to their, Winter ones. Sheaves of wheat or dried grasses and stalks of dried corn are decorative and suggestive of plenty Sheaves of wheat or dried grasses and stalks of dried corn are decorative and suggestive of plenty for men and beast during the coning winter. Hotpoblins in the guise of jack-o'-lanterns are placed here and there, and all lights should be softened and dimmed with orange crepe paper.

If the supper is served round a table an attractive centerpiece would be a sheaf of dried grass tied securely through the center and the

guests should now be scated around it. The hostess has already placed a pail of cold water on the floor in the center. She hands to each boy an old spoon with a tiny piece of lead. He is to melt this on the an old spoon with a tiny piece of lead. He is to melt this on the open fire or whatever heat is provided. He then hands the spoon to to his pattner, who drops the lead into the cold water. The lead forms different shapes as it is suddenly cooled. Perlaps it forms a hammer, when the future husband is sure to be a carpenter; or a gun, and he, will doubtless be a soldier; or a scythe, which indicates a farmer.

An old shoe is now produced and the guests throw it over their shoulders. The direction in which the shoe points as it lies on the floor shows the direction the person will soon travel. It is most unlucky for the shoe to fall sole uppermost.

Supper is now served, a homey one, utilizing for the first time the foods stored up for the Winter.

Here is an example:

terns hosting on top, or cider. Hallowe'se cake and salted nuts. After supper comes the time for redeeming the forfeits. A favorite sturt on Hallowe'en is to make the person repeat backward a familiar nursery rime.

Another stunt is to blindfold a person, turn him around three times and tell him to go through a certain door. As he is likely to walk in any direction but toward the door, the trick is amusing to the onlookers. A boy might be made to try to balance an apple on his nose, and another to blow out a lighted candle while he is blindfolded. Some one else may be required to draw with the left hand a picture of his or her sweetheart.

To the Gitizens of the Municipality of Digby:
Ladies and Gentlemen The 1919 Victory Loan campaign opened on Monday, Oct. 27th, and will close November 15th. Last year the Municipality of Digby subscribed handsomely to the Ioan and I earnestly trust that the canvassers for the different districts who are now soliciting subscriptions will meet with a hearty response from everyone who has any funds on hand. The need for your assistance is as great this year as last; the war is over and we have been victorions but the obligations are still to be met by the people of Canada, and it is absolutely necessary that each section of the county shall do its utmost in order that the full amount of the loan shall be subscribed. This is not a donation but an investment of the very highest class, bearing interest at the rate of 5 1/2 per cent. annually and carrying the greatest security in the

of 51-2 per cent, annually and carrying the greatest section.) Me world.

The Municipality of Digby is asked to subscribe for \$175,000 (one hundred and seventy-five thousand dollars) of these bonds and in order to raise this amount it will be necessary for everyone who possibly can to buy to their limit. Last year we exceeded the amount allofted us and I sincerely trust that this year we shall do equally as well. The necessity is just as great and the investment is just as secure. Buy all the Victory Bonds you possibly can.

## DIGBY WEEKLY COURIER Established 1874 J. J. WALLIS EDITOR AND MANAGES

Digby, October 31st, 1919.

### This Week's

This Week's Courier.

The Courier does not often boast of its achievements but we are proud of today's issue—a ten page paper centaining 1400 inches of space. The Varmouth Light recently issued a 12-page paper, but their twelve pages only contained 1206 inches—and they claimed that paper was the largest ever issued in Western Nova Scotia. But we beat them today! Froud as we are of oar paper we are prouderstill of our staff, which-consists of a foreman and four young lady compositors. We have no apprentice and the foreman, besides making up the pages and setting ads. has to do his own press work. Our press is small and we can only run two pages at a time, which makes five runs of almost 2,500 impressions each for this week's paper. Then our compositors only work five days on the paper Friday morning being occupied in mailing the papers and cleaning up, and Saturday afternion is a holiday the year around. Where can you get a staff of equal size to beat this? And do not overlook the fact that the Courier probably does the largest job printing business of any small town office in the province—and experts tell us our work is equal to city printing. How do we do it? By just digging from 8 o'clock Monday morning until 1 o'clock Saturday noon. The Courier is in an enviable—position; we have a loyal clientele and a loyal staff and the two together caunot but make a good paper—andit is a pleasure to run a paper under such circum-stances.

Do you remember those ages, when your character was being formed — how you followed examples, did what other people did-your senior years at school — your start in business? Recall them if you can. You gained a knowledge you will find useful when your own boy starts out.

Give him the right start. Teach him the value of personal appearance and self respect. Tell him how confidence may be gained merely from a clean shave—or, better still, show him—and show him in a practical way.

and make his morning shave come easy. The old time pulling and scraping is a thing of the past. The haphazard element is gone. There is no need for your boy to know anything but the ease and comfort of the Gillette shave. It is the razor of his time—that to which he is entitled—nothing more, nothing less.

Sold at most stores catering to the needs of men.

Captain Elisha found some solace and forgetthiess of the unpleasant life he was leading in helping the stricken Moriarty family. Annie, the maid at the apariment, he swore to secrecy. She must not tell Miss Carrellae of Alle Visits to her parents' home. Inderstand why, trough elismon, online the state of the visits of the visi

News from the Moriarty sick room continued favorable for a time. Then with alarming suddenness a change came. The broken hip was mending slowly, but poor Parts age was against him, and the shock and long filness were too much for his system to fight. Dr. Henry, shock his bead dublowsy, when the captain asked questions. And one morning at breakfast Edwards informed him that the old man was dead.

Captain Elishs, though not greatly

Captain Elisha, though not greatly supprised, was shocked and grieved. It seemed such a needless tragedy, almost a control of the stricken for the stricken from the stricken from the stricken family made him shudder. But just before evening his blueness had disappeared. He had just returned to his room, after stepping into the hall to drop his letter in the mail chutz when his niece knecked at the door. "Captain Warren," she began harriedly, "the last time I came to you—the last time I came to you—won't you sit down?" "Captain Warren," she began once more, "the time I came to you in this room you were, so I thought, unreasonable and unkind. I saked you for money to help a poor family in trouble, and you refused to give it to me." "No, Caroline," he is larrenged. I didn't refuse; you can yithought does let ne go oft, she began! ### WIFE SLAYER FREED BY BOL-

Was Taught to Kill in War and Merely Followed Out Instructions in Murder of Faithless Spouse,

He Says.

He Says.

A Russian soldier's account of the acquittal by a Bolshevik tribunal of a man who murdered his wife, as given by Manuel Komroff, a former official of Kerensky's government, now in this country, reveals to what an extent barbarous crimes are condoned in Soviet Russias. Komroff gives the story as the soldier witness reported it;

"There was a gunner in our regiment who was one of our crack shots. After the first year he had charge of a machine gun. A fine fellow, but his wife was fitting with other men, and he was of a jealous nature and could not bear it. I would often hear him mumble 'Yes, I love her, but she will die—'she will die.' She did. He killed her, It was when he had two weeks' leave, and he was returning with a St. George cross for bravery. When he came home he forgave her at first. I accidentally met them in a restaurant, eating supper, and they were the gayest couple you ever saw, but a black cloud must have crossed their horizon, for in the middle of the night he shot her through the heart.

through the heart.

LAW RULES DISREGARDED.

"It all came out in the trial. I was one of the witnesses, and so was his wife's mother. She defended him. The revolutionary court did not know the laws, and the man who defended him was a friend and not a lawyer. His friend was very clever. In summing up he said: Here is a comrade before you charged with murder. If ever a man was guilty, he is. The objection I have is that you charge him with only one murder, his last. He has been murdering for over two years, and what is more, he has been killing people in cold blood. Those he killed in cold blood were individually innocent, although collectively. I admit', they are a pest. But my friend is not accused of these crimes at all. He is accused of killing the woman who betrayed his love, sold his home and starved his boy killing her not in cold blood but in the heat of passion. "For killing hundreds of people he did not know he was awarded a cross of honor, but for killing's snake that was once a woman and his wife he is brough here in the clutches of justice. My friend is guilty, and we will not attempt to squitm out of the charges confronting him, but I must ask the court, I must insist, that the charge be corrected to read, "Charged with murder of 2,000 men and one prostitute."

the ruffled shirt. Iront gave us a corrugated appearance instead of the sheet iron front of the present day. As for shoes we have a sort of Hobson's choice, and only in the street car ads, do such collars encircle the shapely necks of determined looking young men. The whole thing appears to be a reversal of the natural process. In ature the male bird has the most gorgeous plumage in order to attract the admiration of the lady bird. Not that feminine dress has always or even usual that motive, for some male bipeds have that art down to a far more scientific basis, but

male bipeds have that art down to a far more scientific basis, but modern conditions demand that a woman look her best on all occasions, while it is often an advantage to the "old man" to look as seedy as possible. Perhaps that is the true explanation, and, if so, it is worse than useless to attempt to induce women to forego style. As well ask the average man to wear a plush hat instead of the battered covering which he affects for the "old bean."

## Home, Sweet Home

A wanderer stood in the darkened street, looking through the window at a happy family within. The scene pictured the longing is his soul for the home he did not have.

The man alipped away unseen, and one day wrote a song—the song of his soul. And this song became immortal; the most beautiful and pathetic heart-song that the world has ever known. The man was John Howard Payne, and the song is "Home, Sweet Home."

You may RE-CREATE in your own home this immortal sone

## 10 lbs. 65c. 20 lbs. \$1.25 90 lb. Sack \$5.40

The above is but ONE of the many instances, in which the management of this store endeavors to cut down the cost of living for its customers. By buying a large quantity of Rolled Oats, a very favorable price was obtained, and this big saving in one of the necessities of life, is being passed on to you.

In the same manner, it was recognized, that in every family in spite of every care, there were times during the day, when milk was very much needed, and yet it could not be obtained, without a great deal of inconvenience. To fill this long felt want, therefor, and to accommodate those of our customers who did not care to pay the increased price, an arrangement was made with Mr. Larchie, of Whitehouse Farm; whereby a sufficient amount of milk should be delivered at this store, to supply all our customers, who desired it. From the results attained thus far, the management has no besitation in affirming that the milk department will be a permanent feature of this store, as long as our customers so desire it.

desire it. Again, in connection with our lumbering activities, it has always been found necessary, to carry a certain amount of proprietary medicines and remedies, in the interests of the men employed. In order to make it more convenient to supply the various camps and stores, and to accommodate our many customers in this town and vicinity, it has been decided to keep a large stock on hand in the store.

Intelligent saving consists largely in foregoing ill-considered or foolish present expenditures in order to be able to secure in the future either necessities or even the more substantial luxuries. Such saving its the opposite of miseriness in that it involves chiefly the post-ponement of expenditure until small sums, which would purchase little in themselves, have acumulated into substantial buying power, such saving contemplates the maintenance of family efficiency, meeting of real necessities as they arise, and, at the same time, capitalizing an placing the family on a sound financial basis.

HERE is a nip in the air these mornings that must be rather sharp to the man who scrapes his chin when shaving

If he used a Gillette Safety Razor, he would positively enjoy shaving every morning, he would look his best at all times, and there would be no cutting or chafing of the skin!

Furthermore, in the time he now takes to get his old razor edge as near right as he can, he could finish shaving with the Gillette.

Stropping and Honing would be a thing of the past for him. That alone is worth \$5,—the price of a

GROWTH OF TRADE

UNIONISM.

War work and the development of the trades union has for the time being made wages plentiful and the hours of labor—even of the shop-keeper class—small. How long this condition may last, or can be made to last, is the most interesting social question in England at the moment. Most of the working class are acting in the blissful belief that big wages and short production will continue. The "calcanny" and "hanging the batch" doctrines are being propagated not only on the docks and in the work-shops, but also in the offices, I am told.

Trades Union organization has spr and to a point where some of the clery of the Established Clurch are torming a trade union. According to its organizer, Rev. Lloyd-Evans, D. D., vicar of Milbourne St. Andrews in Dorsetshire, the new union is out for a minimum" wage work of ESO a very to the mercal to beneficed.

St. Angrews in Dorsetsnire, the new union is out for a minimum wage scale of £500 a year to benefice clergy with all repairs and delapid ations to vicarages paid for out of the funds of the Ecclesiastical Com-

missioners.
Just at present the wage-workers of this great seaport with a population greater than that of British Columbia seem to be engaged in a steady effort to get rid of their money. One hears and discounts the stories of the munition ladies in the fur-coats and lingerie, and of the dockers who bought expensive waters of the many pains and nointed them. the dockers who bought expensive mahogany pianos and painted them green to match the kitchen wood-work. But the frenzied rush of working women in the big down-town shops, and their purchases of expensive attires is a continuing

As a result of public protest at reports of bacon rotting on the dock quays for lack of lwarehouse room, the traffic committe of the Mersey Docks and Harbor Board, inspected 72,000 cases of bacon on the bacon dumps one day last month.

The profiteering tribunals with their hundreds of convictions daily—some of them carrying very heavy penalties—are having a wholesome effect. I am told of retail stores which are revaluing many of their goods. In one case a boot shop has taken three shillings a pair from the price of all its stock, so as not to risk trouble with the tribunals. In the Midlands, fruit, fish and vegetables have been brought under the scheme by a general order fixing the maxium selling price of these foodstuffs at not more than 33 1-3 per cent. more than the wholesale price. margin of difference covering hand ling, wraping and profit—
Some of the tribunals are being confronted with unusual problems. One man hailed a clothes presser to court for charging and pressing a suit. Another reported a tailor for charging four guineas for an extra pair of trousers. A third cited his plumber for charging one slufting and five pence for putting, a washer on the kitchen tap. The bill like most plumber's bills was a study. To-day an indignant citizen is demanding an investigation into the price of invalid port.

EAR is unavoidable even in the WEAR is unavoluable even in the best car, but certain parts wear out more quickly than others. There is no need of scrapping your car because the piston rings have seen their day, because the platinum points of the vibrators are worn out. Probably the rest of the car is as good as new.

Medical men agree that the human body is renewed, cell by cell, every seven years. You can do the same with your Ford Car and prolong its life at minimum cost by replacing worn parts from time to time.

Ford service has been the means of doubling the lives of hundreds of Ford Cars, and cutting down the cost of motoring. The fact that a Ford Touring Car, which costs \$690, f. o. b. Ford, Ont., can be purchased part by part separately for \$917 is ample proof of the economy of driving a Ford Car.

It will pay you to have your car overhauled during he winter months. 700 Canadian Dealers and over, ,000 Service Garages supply genuine Ford parts and prompt repair service.

When buying, choose a Ford, and take advantage of the economy of Ford service.

### Why Rural Press

Why Rural Press
Is a Power.

The average man can live in big city all his life and never see his name in the paper, but the farmer and the average man and woman in any small town will set their names in their local country newspaper at least ten times a year, and always connected with some worthy cause, some faithful service, something that brings joy, all through life. The country newspaper all least ten times a petir, and always want to read about the ball game you, saw the day before? If you witness a fire you read the details of that fire with double interest. If you hadn't seen the blaze perhaps you would not read the story at all. Why is this asks the Belwin (Ia) Iowan. It is because the things you know about are the town and the proper abo

Tea late in the afterneon, and she had been ont since 10 c'clock shopping with Mrs. Dunn, lunching down town with the latter and Malcolm, and motoring for an hour or two. The weather for the season was mild and sunny, and the crisp air had brightened her checks, her yess sparkled, her fur coat and cap were very becoming, and Captain Bilsha inspected her admiringly before making another remark.

and caprain reissia inspected her adminingly before making another remark.

"My, my!" he exclaimed, after an instant's passe. "Twenty years old! Think of it. Bile's gift's a lost he was proud of you too. He ought to have proud of you be the form her shoulders he bent forward and caught a flimpse of her face. There he said hastily. There, he had dearle. I didn't mean to hurt your feelink. Excuse me, I was thinkin't out loud, sort of."

She did not answer at once, but turned away to remove her cap. Then she answered, without looking at him. "He never forgot them," she said. "Course he didn't. Well, you see, I didn't forget either. ### Three million dollars for a phonograph!

That's what it cost to perfect the only instrument that Re-Creates music so faithfully that no one can tell whether it is the living artist he hears or the phonograph — when one is heard in direct comparison with the other. Add to that three millon dollars, Thomas A. Edison's genius, his vast knowledge and his indomitable will and you realize how much was required to make.

## The NEW EDISON

"The Phonograph with a Soul"

"Now go ahead and build replicas," said Mr. Edison to his staff when he had finally achieved an instrument which would meet the fone test. "Call it the Official Laboratory Model and uphold the standards I have set to the last detail."

This three million dollar Phonograph is on display here—come in and hear it.

#### MEANS END OF ALL THINGS

Number "30," Originally Newspaper Symbol, Has Come to Have Sig-nificance of Dire Import.

By frequent reference to it, noted By frequent reference to it, noted by newspaper readers, doubtless the meaning of that cabalistic symbol "80" has become familiar to many, but this incident and explanation is printed in connection with the obsequites of Sir Wilfrid Laurier, in the Montreal La Farita. What does that signify?" Farita. What does that signify? the castet of Sir Wilfrid Laurier and had remarked the bolunce of flowers was asked by thousands who filed past, the casket of Six Wilfrid Laurier and had remarked the bouquet of flowers upon which high the symbol "30" in red figures. This floral tribute was given by members of the press gallery in the Dominion parliament. So as the words which the great departed pronounced some days after being stricken by his malady: "It's ended." (C'est fini.) The origin of this conventional symbol has been lost in the traditions of journalism, but after each night and at the end of every day the conventional "30" traversed the continent from end to end. Editors in time dopted the sign "30" to inform the staff, the yarrious news departments and the mgn "30" to inform the staff, the various news departments and the composing room that all the "copy" was finished and that there would be authing additional. Finally, for newspaper men, the number "30" became the symbol of the end of all things of earth, and even of life.

Yanks Like French Souvenirs.

Yanke solders are keeping the French shops busydhese days. Souvenirs of France and various regions and cities of France are all the go. Among these souvenirs are procedes bearing the arms of different cities. The head of the famous Lion of Belfort, the statue of Bartholdi, the sculptor who designed the souders of Liberty, is another favorite. The Lorraine cross has also proved very popular with the Yanks. This symbol has two sets of cross arms instead of one, It appeals particularly to the Americans because of the part which the Yanks played in Lorraine during the war. The Red Cross dog and the lucky white elephant charm are horderen and the sound of the States—From The Spiker, France.

Famous Old Inn Gone.

The city of Augsburg has seen the last of that famous inn, 'Drel Mobren,' or preferably, in sonorous French, 'Thotel des Trois Maures,' The Bavarian revolution has demolished it with the famous room and fireplace in, which the financier Fugger, to save his life, lit a fire with all those "I. O. U.s.," awkward reminders of a monarch's indebtedness. It was in this hosteric, 'oo, that the fire the daughin. Over the lintel of the "Prois Maures" were carried the illies of France in commenoration of the event. Now the inn and the lilies have trance in commemoration of the event. Now the inn and the illies have disappeared in another such cataclysm as swept Marie Antohette to the guil-totine, some hundred and twenty-odd years ago.

#### Economy of Ford Service

WEAR is unavoidable even in the YV best car, but certain parts wear out more quickly than others. There is no need of scrapping your car because the piston rings have seen their day, because the platinum points of the ribrators are worn out. Probably the rest of the car is as good as new.

Medical men agree that the human body is renewed, cell by cell, every seven years. You can do the same with your Ford Car and prolong its life at minimum cost by replacing worn parts from time to time.

> Ford service has been the means of doubling the lives of hundreds of Ford Cars, and cutthe news of numerous of root Cars, and cut-ting down the cost of motoring. The fact that a Ford Touring Car, which costs \$690, f. o. b. Ford, Ont., can be purchased part by part separately for \$917 is ample proof of the geonomy of driving a Ford Car.

Ft will pay you to have your car overhaulch during the winter months. 700 Canadian Dealers and over 2,000 Service Garages supply genuine Ford parts and prompt sepair service.

Sixt-thirty was the usual dinner hour.
It passed. Seven o'clock struck, then 8, and still Captain Elisha sat alone in the library. The cock sent word that the dinner was ruined. Edwards respectfully asked "What shall I do, sir?" tylice, the second time being sent flying with an order to "Go for'ard and keep your batches closed!" The fauntial phraseology was lost upon the butler, but the tone and mauner of deliver; but the tone and mauner of deliver; we have a subject to the tone and mauner of deliver; we have a subject to the tone and mauner of deliver; we have a subject to the tone and mauner of deliver; we have a subject to the tone and mauner of deliver; we have a subject to the tone and mauner of deliver; we have the captain rose from his chair to telephone the Dunn house and ask the reason for delay. Each time he decided not to do so. No doubt there were good reasons. Caroline and her brother had been detained. Perhaps the automobile had broken down; the had been detained. Perhaps the automobile had broken down; the had been detained. Perhaps the automobile had broken down; the had been detained. Perhaps the automobile had broken down; the would not phone just yet. He would wait a little longer.

At last the bell range, Captain Elisha sprang up, smiling, his impatience and worry forgotten, and, pushing the butler aside, hurrled to open the door himself. He did so, and faced not his niece and cupplew, but Pearson.

## Chicken Bones à la Neilson

HAVE you ever eaten chicken bones? No! Not the bones of a bird, but a chocolate coated mixture of chopped figs, cream and sugar.

They taste delicious, so let us tell you how we make

We buy rich, juicy figs from Smyrna, cane sugar from Jamaica, cream direct from the farm, and blend all three into a delicious confection.

The figs are minced, the sugar and cream is made into a paste, and then the figs are rolled in the paste until a complete mixture is formed. This is rolled to the diameter of a pencil.

The figs are in the middle. The paste is then cut into two inch lengths. Each contains its portion of figs. From there the "chicken bone" goes to the dipping room, where it receives a coating of very smooth and delicately flavored chocolate, and so on into the box.

Next time you Buy a Box of Neilson's, watch out for the "Chicken Bones."

ramia has been worth to me, "said Mr." [McCullum, in an interview, recently, "in restoring my health and putting me on my feet. When I got home from the war! was simply a nervous wreck and neither time or medicines seemed to do me any good. I was so nervous and shaky I could hardly hold a cup of tea to my mouth and if my wife happened to dropa for for kinite at the Itable I would nearly jump out of my chair. In this excited condition, my food could not digest, but would sour and form gas on my stomach adding more misery to my already desperate condition. I would toss and roll most of the might getting only about two hours restless sleep, and would sometimes have to get out of bed and walk the floor. My condition was distressing in the extreme and semed to be many good, but it has not only helped me, it has made me feel like a bear and eaf just anything set hefore me without the least effect from it. I have been built up and strengthened until my nervous ness is practically gone I can sleep all might long like a log and my wife has a job waking me up in the mornings. I am now able to do a full day's work and Tanlac gets all the credit for me being on my feet. My nerves have steadied down until I can stand all sorts of noise and sudden jars. When I first began laking Tanlac to all the boys, especially those suffering like I was, take a 'tip' from meget Tanlac, for I fully believe I would still be a nervous wreek if I had not taken it myself."

The term pumpkin, a corruption of pomprion, is very loosely applied in this county. In some sections in the second of pomprion, is very loosely applied in this county. In some sections in the second family. It is a vigorous, prostrate plant, running twelve feet or more, with a hinry almost prickling stem. It bears large, bell shaped yellow flowers, five cleft, the base adherent to the callyx tube, with three long, much curved anthers, which unite into a small head, and three stigmas. The fruit is fleshly, with a firm rind and is nearly round. The outer surface is ribbed or furrowed, the internal portion mellow and crossed by pulpy threads. The average size of the fruit is about one fool in diameter, though it is often much larger; its color is of a clear, orange yellow.

Pumpkins are largely cultivated both in Europe and our country, playing an important part during the Thanksgiving festivities when made into pies.

As ordinarily grown the seeds are planted in fields of corn and potatoes and the plants left to taketare of themselves, yet even with this neglectful cultivation, it often yields as much as a lon of the fruit per acre without apparent detriment to the yield of corn or potators in the same field.

The native country of the pumpkin is disputed, but there is good reason to believe that it is indigen; is an abundant boarer of excellent plants.

The common field pumpkin was muchiused for food in New England before the introduction of improved varieties or of the imore edible squashes, being made into pies, cooked as squashes are now cooked, or baked, the seeds and stringy matter having been removed. For winter use it was cut into strips and dried in the sun or in a warm room. At present it is mainly used to feed farm animals, born in one town and were married the same day by the same minister. OR most conspicuous bravery and devotion to duty on September 2, when under most intense shell, machine gun and rife fare, he went through the Queant-Drocourt support line with the battalion. Without hesitation and with atter disregard of personal safety he remained on the field until every wounded man had been attended to. He dressed the wounde of a seriously wounded officer under terrific machine gun and shell fire, and with the assistance of prisoners and of his own men, succeeded in evacuating him to safety, despite the fact that the bearers suffered heavy casualties.

Immediately afterwards he rushed forward in full view of the enemy, under very heavy machine gun and rifle fire, to tend to a wounded sereant; and having placed him in a shell hole dressed his wounds. Capt. Hutcheson performed many similar gallahi acts and, by his coolness and devotion to duty, many lives were aved.—OMedia Record.

Neidpath Farm Near Stratford, Ont.

Dear Sir:-

The Delco-Light Plant you sold me to light my farm has not only given us the pleasure and convenience of electric light in all our buildings, but it is rapidly paying for itself in the work it does.

It would be a good investment for us aside from the lighting altogether. So far, we have found 16 jobs for Delco on our farm, and we are constantly finding new jobs for it. We are using power from Delco-Light to run.

3 smit milking machine.

Cream separator.
The pump in the dairy.

Root pulper.

Emery stone Horse clippers.

Sheep-shearin Fanning mill.

Washing machine.

(11) Electric iron.

Toaster.

(13) Charging batteries on our motor car.

(14) Pumping water for house-hold use.

(15) Lighting our home, stable, outbuildings and yard.

(16) Violet ray generator.

We have never figured this work down to so many hours per day, but we do know that we can operate the farm with one less man than we used to. Figure out the wages and board of a farm hand and you can see what the Delco-Light plant saves us.

We used to run a gas engine on the milker and cream separator, at a cost of 10 cents a day. Our Delco-Light plant supplying light and power for the whole farm costs only 7 cents a day.

It would not only be a harder proposition to run our farm without Delco-Light, but it would cost us a lot more money. We have no hesitation in recommending any farmer to harness up his farm to Delco-Light.

Yours truly.

(Signed) WWBallantyne

The man who considers Delcol-Light something that he will buy —when he can wford it—should heed this strong letter from Mr. Ballantyne. It costs more money to farm without Delco-Light. Can you afford, then, to delay equip-ping your farm with light and power?

# When the Tongue is Pleased the Mind is Satisfied

THE most difficult thing to set down in words is the description of a taste, because there is no word to describe taste but taste. So, when talking about the taste of Chocolates, the only way to stimulate the sensation you enjoy from eating them, is to tell you that they are luscious, or satisfying, or delicious, or that they flatter the palate, or that they have such and such a flavour.

But you cannot get real conviction about the "quality of taste" in Neilson's Chocolates except by tasting the Chocolates themselves. So we want you to go to your Druggist or Confectioner and buy a box.

Don't eat them hurriedly. Consider each piece carefully. Open a few pieces. Let your palate linger over the flavour of the coatings, the fruit, cream and nut fillings, and the blended flavour of the fillings and coatings together.

> If you will do this and eat, as continentals say, "with appreciation," you will get a remarkable quality of enjoyment from your purchase of

Canadian Infantry Battalion.

Irrespective of politics, religion, and vocation, all returned men should immediately become members of the Great War Veterans?

Association. This organization stands for the relief of sorrowing widows and orphans; and also for those who have been maimed. Further more, the Civil Shield demands respect throughout the whole Dominion and insures the members of loyalty, justice, and right-thinking.

Sincerely yours.

Sincerely yours, (Signed) J. WISE.

# How the Apple Got into the Dumpling

is a small mystery compared to how the maraschino cherry is made to float inside its chocolate coating.

To one who has never seen it done, it may well seem difficult—if not impossible. Let us tell you how we

First of all we make a delicious boiled cream. This is then placed in heated containers to keep it soft. The maraschino cherries are next examined to see that each one is perfect. Then one at a time, the perfect cherries are picked up with a fork, dipped into the cream and laid aside to set.

The second stage takes place in the chocolate dipping room. Here the cream-coated cherry is rolled in warm liquid chocolate. As this cools and sets, the cream melts, and-presto!-the cherry floats.

As for the result—well, you must taste Neilson's Maraschino Cherries—they are more luscious—

we were about to say—than mother's apple dumplings

# THE MAKING OF YOUR TOWN A FAMOUS We think the following little sermon which we elip from an exchange is well worth the reprinting. It has an application to Digby as well as to many other towns:— As you travel through the country you pass through many small towns, all of about the same size and all more or less alike. And yet, as you look at them through the train window, they make different impressions upon you. As you pass through one town you will think. "What an attractive town: I should like to live here." And yet, a town only a few miles distant will create in you a teeling of aversion. What is the difference in the two places? The answer can usually be found in the fact that one gives

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

What is the difference in the two places? The answer can usually be found in the fact that one gives the appearance of prosperity and "pep" while the other does not. The streets of the first will be clean; usually paved, the lawns will be well kept, the bouses painted, and the people you can see from the train will be bussting about as though they had plenty to do and were glad to do it. The second town, on the other hand, will appear slovenly and ill-kept. Tumble-down houses set in weed-choked lawns, board walks, streets strewn with paper; will meet your gaze, to extract the medicinal properties from these herbs.
Every utensil and tank that comes in contact with the medicine is sterilized contact with the medicine is sterilized the medicine is pasteurized and sealed in sterile bottles.

Must of our troubles wouldn't look half so black, were it not for the brilliant back ground to which we hold them up.

Hadn't Enought Civic Spirit to Light a Bonfire

There is a city in Michigan whose citizens once raised a fund of \$55,000 to be spent in what some one has described as the business of "factory grabbing." The money was so spent, in three years. It did not bring a single new industry to the town. When the fund was about exhausted the organization met to wind up its affairs. The motion had been made and seconded when a leading citizen arose.

"We have spent our money," he said, "and haven't a thing to show for it. This has set me to wondering if we were not on the wrong track: While we have been trying to bring factories here, we have overlooked our own city. The streets are out of repair. We have the commodities, advanced 1.3 per cent, during the public by fine factories here, we have overlooked our own city. The streets are out of repair. Let's try it for a year anyway.

His enthusiasm prevalled At the end of the year the results were such that the organization financed itself for another year, and then a third.

GREAT deal has been written on the food value of Chocolates, or candies (as some people call them). Well, as an emergency ration, a box of Neilson's or any other good Chocolates has a sound food value.

But it is our belief, that people buy Neilson's Chocolates because they are luscious to the taste and delightfully satisfy one's craving for something sweet.

Every maiden should know that when her "man" or her "boy friend" (as she may call him) comes bearing a gift of Neilson's he is bringing to her the most delicious Chocolates that money can buy.

Just why so many Canadians think of the good Saint Nicholas asia Ger-man saint, and on second guess accred-it him with Dutch ancestry, is not

celebrated in some countries as the "gift festival" of the year, was of Textentic extraction.

The Christmas saint reality was borst and Minor, in Panthera, in the province of Lycia, some time in the sixth century. St. Nicholas yebrosing the other countries of the sixth century is the control of the countries o

He was protector of the weak signing the strong, the poor against the rich, the capture, the prisoner, the blave. He was especial guardian of maidens, stonobioys, the orphan poor. Throughout all Catholic Europe children are taught to reversence him, and to believe if they are doctle and attentive to their duties he will fill the cap or stocking, with dainties; if they are natigaty or idle, he certainly has a rool in pickle to bring along for them.

Although strangely little is known of St. Nicholas in America, a few churches scattered over the country hear his name. No saint of the calen-dar has as many churches, altars and chapels etected in his honor. Most towns in Eugland boast churches bear-ing St. Nicholas' name. There are more than a hundred in Belgtum and thousands scattered over Europe. But-whurever he is worshiped and his birthday observed it is always in re-membrance of the fact that he is a fol-lower and disciple of the Christ, whose coming was the greatest gift of all.

In the tide tables-for St. John, go the highest normal tides that occur regularly during the course of the year, can readily be found; but it is not possible at the beginning of the year to know whether a storm will occur at one of these dates. The tidal survey has taken the precaution, however, to draw attention widely to these dates, for the bene if the tides of the protection of property and stores along the waterfront of coast cities. The following notice is published in Agricultural Journal and also in Belcher's Almanac in the hope of avoiding damage.

"If a storm should occur at the date of one of the usually high tides shown in the tide tables, there may be flooding of the dyked marshes in one locality or another according the direction which the storm may take. Farmers may therefore reduce the chances of damage by placing their crops in safety before the date of any such specially high tide in the autumn in case it should happen to be a storm tide.

The dates indicated for the autumn of the present year, accompanying this notice, were as follows. October 10 and 12, November 8 to 10 and December 7 to 9. The dates indicated for the autumn of the present year, accompanying this notice, were as follows. October 10 and 12, November 8 to 10 and December 7 to 9. The date of the high tide of this week was thus included as a possible one. A further help in the Bay of Fundy is that the spring tides occur about noon or midnight; and it can thus also be indicated whether the high-test tide at any season will be a day tide or a night tide.

For the protection of goods stored along the water front, much might be done if it were thought worth while to take the trouble to do so; although the trouble taken to move goods would only be in view of a possible chance. It would, be of the same character as money spent on insurance; and it is not every storm that raises the tide. For if the centre of the storm, on its usual eastward course, should pass to the north of the bay, the wind will be inward and will rais

will be inward and will raise the tide. It is more usual, however, for storms to travel along the general line of the Atlantic coast, well south of the Bay of Fundy. The tidal survey has also taken careful observations of the extreme levels reached by the tide, not only in St. John, but also around the head of the Bay of Fundy. From the marks which record these levels, the farmers can build their dykes to the extreme height which the tide has reached in many vears, and the extreme neight which the tide has reached in many years, and thus obtain additional security Similar levels are available in St. John and other coast cities.

# The Quality of Neilson's is not Strained

NE, William Shakespeare, created a character, Portia, who said to Shylock, "The quality of mercy is not strained."

People who have read it have never forgotten it. But few reflect that the quality of anything is not strained. If it were, then it would cease to be quality.

What, then, do we mean by adapting it to Neilson's? Just this: that from the cocoa-beans of which we make our coatings, to the fruits, nuts, creams and other confections that we use for fillings, we use only the finest materials.

This quality is also paramount in our process of manufacture, and packing, because many a box of chocolates is bought on appearance. Although the artistry of our boxes may not appeal to all, it certainly will appeal to people of refinement.

And it is these people who will most appreciate the delicacy of flavour and unstrained quality of Neilson's Chocolates.

Short Cuts to Eminence and Immortality.

The trouble with all these courses on the development of will power, memory, executive shifty and all that sort of thing is that they merely play around the outskirts of greatness; in the lessons outlined below we give our readers some specific short runs to eminence and immortality. These instructions have all been followed with success by men who were actually in the busness of being great.

1 Cross a river. This method was employed with success by Mashington on the Delaware. This was dead to refer the advising prospective great men to go to Brooklyn or New Jersey, at a slight increase in expanditure. However, students may play as be by crossing the river twice.

2. Cultivate a Wart. Very important. It will be remembered that Oliver Cromwell insisted that his wirt be painted right into his portrait. We must warn our customers not to bave anything to do with toads, as they are unreliable; the best way to obtain warts is to cover your pillow with sandpaper just before retiring. If you are at all doubtful about the value of warts, lwax reminiscent, and you will remember that all the leaders of your broyhood gangs had warts, 3. Hold horses. #### MUST BE BORN A SINGER

According to recent scientific dis-coveries, singing birds, like human singers, must have a certain type of hroat and nostrils, A full throat, large throat and nostrils. A full throat, large thorax, open nostrils and slightly pro-truding lips with good length from the point of the nose to the point of the chin and full checks are, say the scien-tists, positive signs in a human being of the power to give forth tone.

of the power to give forth tone.

If the ears are round and well set to the head it is a sign not only of the power to Sing, but to appreciate, and the combination means the great artist. With feathered songsters much the same rules hold good. The round, somewhat pointed beak of the canary opens wide and his thorax and throat are exceedingly big for so tiny a bird, according to the Philadelphia North American. He can hear and appreciate the smallest sound and his trills and the beauty of his tone are due to his throat, to the roundness of his head

the smallest sound and his tritls and the beauty of his tone are due to his throat, to the roundness of his head and the shape of his bill. The duck, on the other hand, having a flat bill and a small throat can only quack. Even if he longed to sing he could not acquire any pleasant notes, and it is the same way with score power. and it is the same way with some pile. The most careful training cannot give the sound box which nature provides for those to whom she gives the great gift of vocal powers.

May Mean War on Rats.
There is not conount leather to go round. Fish sixtus are susceptible to tanning; and there are rat skins which make good leather, large enough for some kinds of gloves and mittens, says the Little Journal. They may be sewed together to make cloaks and other gaments, and they are not too small to be available for parts of boots and shoes. The general rule as to leather is that the thicker the fur is the poorer the hide, and vice versa. According to this, rat hide would produce superior leather.

It would take at least 5,000 skins a day to supply a small modern tannery. Nobody wants the rats; they belong to anybody that can catch them. That is the oulr problem—to eatch them and

New Insulating Material.

A new insulating material that is incombustible is made by mixing 51.7 per cent powdered asbestos, 14 per cost powdered mice, 20 per cent mineral ruther (a soft substance found in deposits of oleaginous schist); 1 per cent rosin and 0.3 per cent of bisulphide of selenium. After washing and evaporating in the juit, a hard, unon-absorbent substance is obtained which on-heating, becomes plastic and can be molded to any shape.
