 An beact that marges similation for swimming should's provide the protection of a life guard.
 Any person resuing a cape or bast should three offer proof of ability to swim.
 Any nervointer should wear some agives on distinguishing mark. Fuch as a white band on his suit.

guishing mark such as a white band on his suff. Finally, we want to warn parents about artificial and so svin-ming. Actually rubber tubes and plastic ware wrings are not aids to swimming at all. They are hindrances. They give faise conf-tence. They are diagerous: Every year in every proving endifferen-are droxends simply because they relied on some inflated gadget. These placeforms not reliable. A non-swimmer bucyed up by an inflates tube and bucyed up by faile confidence will drift over his dept. A wes subpert tube is almost impossible to regain once it off the tube in becomes light and bucyen and swims away on the wine. Some children go to the bach year after year cartring water wangs and they suit cart warms. "Though travelling alone "

Miss S. N., home from Europe, writes to thank her bank for the way the accountant helped her with money

arrangements: "Mr. W. expended considerable effort to

arm me with details of various European currencies and methods of procedure, enabling me, though travelling alone, to avoid much of the delay and embarrassment encountered by many experienced travellers whom I met along the way. All of which contributed in no small

degree to my comfort and enjoyment." The bank can smooth the way for people travelling on business or pleasure at home or abroad. Providing Letters of Credit, Travellers Cheques and other sistance is just one small part of the day-by-day service rendered by any. branch of any chartered bank.
