About This and That

Another Forward Step In Education

Having been a school teacher for ten whole years (and liking it) is prob-ably inte resears the other of the Dipby Counter reteins so much interest in edutation in the radership area and notes the many changes which have taken place in thirty-odd years. The headlines in our last issue of The Dipby Courier "Continuous Evalua-tion of Students Replaces Formal Exam-inations" was extremely Interesting. Be-quee of was

tion of Students Replaces Formal Exam-limitons' was externelly Interesting. Be-cause of our interest we ergret we missed the full report which was given by our Digby school commissioners held in the after-neon instead of the usual evening ses-tion.

We recall, with pride, the year teaching in a small Nova Scotla town some thirty-five years ago that the prin-cipal and staff decided to do away with es to designate a student's standing a subject and use the letters A. B. C in a subject and use the letters A, B, C and D, Our reasoning was that no persoin can be 100 per cent and each teacher evaluates differently so 90, 91, 92 or whatever didn'r rally present a true picture anyway. These figures had one reddering feature, viz, parents of a brilliant student could global if their Johnny got a 95 on the report card and someone alex's limory out on 04 94. In 19 40. someone else's Jimmy got only 94. In other words their child's worth was, more or less, in relation to someone else's child. Parents found it difficult to reelse's Inquish their pride on this score so the A, B, C, D method went out the window A, B, C, D method went out the window at their particular school ere long, we believe. Probably our error was to do this without first educating parents to its advantages over the figures method. True, back in the 1930's, the A, B,

We Want Reasons

At the 48th Maritime Christian Youth Parliament held at Wolfville a substantial majority voted for legalization of soft drugs such as cannabis, marijuana and hish. According to the daily press the youthful parliamentarians approved sale of the drugs at drugstores to persons 14 of the drugs at drugstores to persons 14 years and over. What we failed to see mobinted ware the reasons given for sup-porting such a vote. Were there any? White there any dissenting outces, and what were their reasons for dissenting? What will be the consequences should marijuma be legalized? Or, for what reason do we need il legalized?

According to the Royal Bank of ada news letter of September 1968, the use of marijuana was a serious prob-lem in the United States as early as 1936 where it appeared in high school circles and among other groups. The principal effect of meriuma, as noted in the same article is upon the mind. Its continued use produces pronounced menial 'de-terioration in many cases. Its more im-mediate effect apparently is to remove the normal inhibitions of the individual and release any anti-social reducerics. It may cause dangerous distortions in time, space, motion and behaviour, the news-lefter states. It may give rule to violent aggressivenoss and uncontrolled vio-inere", still quoting. This is to violent aggressivenoss and uncontrolled of more dangerous drugs files Usb, etc., of more dangerous drugs files USb, etc., where it appeared in high school circles of more dangerous drugs like ISD, etc., which marijuana use is thought to lead into. These statements hardly arouse thoughts of legalization.

Unless if had been proven that marijuena is in no way harmful, why did the young Christian parliamentarians want to have the drug logalized? Is it because they voled in ignorance and do pol, know the dronger? This is possibly 50. The Royal Bank of Canada news letter states that many young people have said that they might not have been curious

C. D method was superior to the "90, 91, 92, 93" method (by the way, we made a practice of nothing over 95 aince no one could be over that parfeed) but today with our enlightened genera-tion the Ar, B, C, D method has been far surpassed by other methods of evalua-tion, such as reported in our columns lest whet last week,

One thing we would like to impress One thing wis would like to impress on parents and that is these decisions sludy. Education is serious business to day. Many advantages for thinking out these improved methods for the advance-ment and byterment of students are available. We've reported before on many of our teachers who have taken advantage of summer school courses where they are often exposed to new methods of teaching and thinking. A far cry from the inspector and the one man cry from the inspector and the one man principal of a school of the editor's genprincipal of a school of the editor's gen-eration, we now have inspectors, super-intendents, general supervisors, specia-tists in their field such as supervisors of curriculum, sender principals, junior prin-cipals, teachers and other personnel whose collective thoughts, experiences and knowledge in their own fields cul-minate in progressive education such as and knowledge in their own fields cul-minate in progressive education such as the "Continuous Evaluation of Studenty". When the supervisors of various types report that, quote, "they would" like to see the pupile evaluated on their own ability and performance in daily

like to see the outpils evaluated on their own ability and performance in daily work instead of evaluated against the abilities of the classmates" we hope the parents realize it is the good of the stu-dent which the supervisors are thinking about. enough to try drugs if they had known more about them. According to a T.V. interview shown on Monday evening with a very young and pretty Canadian girl imprisoned for eighteen months in another country for being in illegal posanother country for being in illegal pos-session of driving, she was shocked to think she had to spond all that time with prostitutes and other kinds of women prisoners. We also recall a conversation in Digby whith a young girl was sur-prised to knowly there was a fine for illegal possession of drugs,

Ignorance might play a part both by young people and by parents, yet it seems there has been much written about non-medical use of drugs if people want to know the truth and face It. As early as August 27, 1970, an article by Lance Woolaver and Max Woolaver on the "Facts On LSD" appeared in this news-"Facts On LSD" appeared in this news-paper. We have on reason to doubt the facts stated in the article which ended "true ain next week for the facts on marifuana". That article was not submit-ted and because of this our readers are probably much less wisc on the subject than they might have been, but there are other items of Merature to be ob-riand. tained.

One thing certain, the news in Digby and the Valley recently has convinced parents that trafficking in drugs has gone on. Being aware of this they might make a point to distribute facts on non-medical of drugs not only to teenagers but

use of drugs hot only to techagers but to others. Isn't this the month when the Digby District Home and School have their pro-gram on drugs? Parents should be out in full force. Maybe we'll hear reasons why we think they should hot have why the hink they should not have voted that way. At least we should try to know the reasons for their action, if there were reasons.

Our last issue of The Digby Courter came out on December 31, the last day of 1970. Init we reviewed some of the 1970 events in Digby. It was so very near to 1971, the dag before New Year's Day, but actually this issue is the first issue in 1971 and more reviews and messages from officials are contained in it.

PAGE TWO

Objectives of Minor Hockey, Week are to direct public attention to the char-ecter-building, physical and other bene-fits of participation in, hockey and pro-mote Minor Hockey in the community, Minor Hockey Week honors those who serve in a volunteer capacity and encour-ages others to participate. Minor Hockey

Week provides an avenue of publicity Informing others what goes on in the Mhor Hockey world. Remember the slogans — Don't Send - Take your boy to the àrens - and stay to see him play. Minor Hockey is a MAJOR Community affair, Minor Hockey is a MAJOR Community affair, To keep a boy out of hot water - put him on key keep in Step with Canada - Observe Minor Hockey Week.

Watch for the winner of Digby Minor Hockey Week new Courier spon-sored slogan contest. Only three more days to enter after today.

More Parent Participation

One of the best meetings of its nature was held a simit's cover last weak when the annual meeting of school ruteres and rategares was held at the school. The meeting was not the best of meetings altendance-wise although the school the meeting as a school of the meetings attendance-wise although the school are school and as the meeting as the school of the school of the complete suffaction a few minor details which bothered parents as well as some of the more important sepects of school life and educational problems. It looks as though Smith's Cove School One of the best meetings of its oks as though Smith's Cove School can be put on the map and much incan be created in the entire comm

can be created in the entric community. A few popel who attended the meeting last week had concarns to air. This was done in a polite adult fashion and response was given to the concerns in a statight forward manofe by those who knew. Discussions brought out much batter understanding of the pren-tesherichild concarns, legitimate com-promises were forthcoming in many promest, and all wert home, we can cher-cm. mises were forthcommy ... pects, and all went home, we can gety say, with a healthy feeling to-

wards, Smith's Cove school life. Yes, that is true of those who at-tended. Buy, what of those ratepayers who did not show up for the meeting? Would they have a right to criticize, under any circumstances? We think not. under any circumstances? We think not. Furthermore they lost an opportunity of help improve their school and com-munity. They lost an opportunity to make their school area a better piace in which to rear their children. They lost an opportunity to meat with other par-ents and to keep open the lines of com-munication between their children, the teacher and themselves. But all is not lost. Redeeming fea-tures of small gatherings are the inti-macy which exists, the frank, uninkbili-todes and the stum-bing-blocks which area be more readily removed through personal contexts. One

removed through personal contacts. One of the most encouraging features of the annual meeting was the appetite created for further dialogue and study. We understand this will take place following the issuing of January revort eard the issuing of January report cards. We strongly urge More Parent Par-ticipation, You'll be glad you attended.

Ice And Snow Skid And Water Ski-d

At a time when banks of snow make corners and driving lanes alm too dangerous to operate cars, whe erguments are pro and con on when erguments' are pro and con on where the every growing number of snow-mobiles should operate, it is difficult in this of Water Skiding with a cor. Call it aqueplaning, if you will. But, there will be only a matter of weeks (despite ac-pressions which include July) until the anow will have become water and rains will be failing. We are told that the same principle that makes a water skipr or motorbast

that makes a water skier or motorboat tift out of water also applies to a car, tire. The car tire lifts off the pavement and rides on a thin film of water. That is why there are so many car accidents in wet weather. The front wheels, coast-

ing on a film of water, go out of control. Skid resistance can be improved with good tread on tires and the higher tire pressure is better for control than low pressure. A dangerous feature is having three good tires and one bad tire on a vehick

Drivers should always reduce travel-ling speed in wet weather conditions be-cause of this aquaptaning and because the asphalt or concrete highway has less traction when coated with either water, snow or ice

snow on ice. The spesent driving conditions are treacherous. The ke and snow make driving hazardous. But, a. few more weeks will bring untolkied equeplan-ing" unless we take caution against water ski-d by speed control.

Encouraging Highway Safety News

Somebody needs to be commended. From January 1 to October 4, 1970, Intere had been 147 highwey falalities in Nava Sotia. These were far too many but this news was encouraging because that figure represented 35 fewer deaths than in the same time thor provious year. What makes this news more encouraging bis, that there was a five per cont increase in motor vehicle registration, a 20 per centincrease in torusis traffic and a traffic toward more mileage. Part of this greater highway safety could be due to better driver-deducation and better driving pro-Somebody needs to be commanded

ms and campaigns. A release from Nova Scotia Insurance Agents Association this weak gave praise to the government highway safety progra and said that Nova Scotia's safety-co scious drivers were beginning to re some of the economic benefits (low some of the economic benefits (lower premium rates) from intelligate use of motor vehicles. Nova Scotia is one of the few provinces showing a decrease in 1971 premiums. Only one exception stands in the way for even better record and that is the motorist who is unmar-ried and is between 25 and 29 years of state.

Q. 1 am a fisherman, married and with family, and since 1 July, 1948, I have paid \$1.40 each week for Unemployment Insurance contributions. 1 have just be-come unemployed. How much will I receive on sessonal benefits?

A. Provided you have a minimum of fifteen con-tribution weeks since 1 July, 1968, your rate of benefit is based on the average of all contributions to your credit from that date up to the effective date of your cleim for benefit. The maximum is \$33 per week for a person with a reasonder.

The community here is very small, But very friendly, too. We get along so very well, As well as most folk do! 11 1 We have all kinds of people, The rich and in-between; The poor are always with us, As they have always been, Our schools are wonderful these days, The interest very high. Our youngsters, all, are working hard, if To them, the time does fly. Our churches here are very nice, We only have the two, They both are pleasing to the eye, They are so bright and new. We go to church on Sundays, Sometimes, three times a day. "How can you do it, I just can't!" So many people say.

We find it cheers us up, so much, When we are feeling low! We listen to the sermons, . -Our hearts are all a-glow,

We sing the songs of Zion, Of God's "Amazing Grace", And all the other lovely hymni Such hymnis, as "Face to Face". 1. 14 nns, P

The church won't save us, that's for sure, No matter what its name. It's how we live along life's way And how we play the game.

So let us live from day to day, The way we know we should, Twill bring us peace and happiness, To live a life that's good. ø Bertha G. Mullen.

About This and That

A lady from Halifax who spent the

weekend visiting relatives in Digby was most enthusiatic in complimenting Digby for having the main business area of the town so well shovelled out. In Halifax, she remarked, you have'to find the parking meters in the snow bank. A letter from Halifax, also, described the treater there in the snow parager file streets there in the same manner. The driving through narrow shovefled streets s quite dangeçous, we gather. Side-walks, too, do not seem to have the ís qu atten attention that they get here on Digby's main street. We ourselves recall being main street, we unrey get there on Didpbys main street. We consolves recall being in the city some years ago and found ice and snow on cleared away as we thought would be done. Explanation was what already the city had shot its snow removal budget. We pass this informa-tion along as a compliment to our council and the streets committee in Didpby. True there are a few blind corners

It is at the corner of King St. and Church St. Extreme caution must be used at that particular corner. With all the compliments lavished on the streets committee for its excellent 5000 (fermould in the must tree above snow removal job, we must pass along a question that was passed on to us. It was, how does the town determine was, how does the town determine which areas to thoroughly ployee effer a spow storm? All the down town business establishments are thoroughly sholelled out but what about other business estab-liahments within the town but which are not situated on the well ployghed-out front street? When we were back in Digby he met many more Digby people and when he reads names in the paper he starts thinking of his old friends. I have the Courier to myself for a few hours but once D. most impossible to prepare as I must stop and help him with some names. The and help him with some names. The questions run along his line – "Where did I meet Carl Melanon?" So I tell him I was at the Conservative momination and his reply is - "doth his wife is Rens. Didn't we get a card from their son at Christmas?" Then he asks me if Torio Dogate is Jean's mothers and I have to ponder a minote and say yes and tell him he mei her al boland's when I had my wedding heets dyed. All this dis-cussion is over two lines of newly in salided legion officers. So you see it takes us a long time to read Digby's Count Ferry week a line bit of Digby, Bear River and Weymouth drops in to pay a little visit. Somerimes I think i makes me homesick but our week wouldn't be complete without it. B. C. is a long way from Digby and is a great deal cheaper for the New Year. Thank-you all for a fouch forme. See you in the summer." — It in't only Halfars object who should issue warnings about coming out of driveways which have sumplete high on either ride. Digby has them too. questions run along this line - "Where

Like painted gnomes they bustle along Over the wide and ghoatlike seas, While showers of anow fly in the air . . . Like apple blossoms on the breeze,

Over the silvery lanes in the night Over the silvery lanes in the night, While motors sputier and whine and well, They circle and weave a pageant of light, And leave hieroglyphics on the trally Tracing a pattern of golden hace Like one-eyed monsters from outer space. ۵.

Now men are plants, deft and fl

And perform such Herculean feats; But they can't resist these teenage loys Because men at heart are "little boys".

Our species numbers something over three billion. By the end of this century, barring some terrible casts-tropie, there will be six billion of us. I have no statistics on the subject, but I would wager that we outnumber every species with which we share this globe with the possible exceptions of cartian ingle celled animals, some worms, mice, rats, housefiles and cokraaches. We do keep good company!

Last November, somebody shot a bald eegle on Pelce Island, in Lake Eeric, Unit carly January, when a passing slander discovered it, the bird lived with Its mate, who must have brought it fload, and cared for it. Fortun-ately, or undartunately, the men who found the injured eiglo was a throughtful type, who notified the maturelists of Point Palee National Park of the bird's plight. The bird was flown to the mainland by chartered plane, and had its wing amputated.

About This and That

White Cane Week

"White Cane Week was started by The Canedian Council of the Blind and CNIS," said A. N. Magill, managing di-reter of CNIS, "The COB is the national organization representing some 80 clubs of hlind people. In 1946 both organiza-tions realized the need for an educational program to tell the public about the achievements of blind people and pre-vention of blindness." This year, White Cane Week is February 7-13 and the Same is "For Cane is Your Care". terne is "Eve Care is Your Care"

It is a fact that six people lose their at every day. Of course much of this lue to diseases which are difficult to

 Two new programs have been added to the CKDY schedule. Both are beautiful programs. Or, at least, beautiful to the Courier editor's tastes. Mrs. 'Penny' Gott started a poetry program entitled Tideflow on Thursday evenings at 9:45 Tideliow on Thursday evenings at 9.45 ordock, Her intr program was dedicated to Elisen Cancoro Heary. Eileen has a foulman in the Antigonith Castet which this editor likes to read each week and ahe has just recently published a new book. Mrs. Gott read one of her poems on Thursday evening and indentially Mrs. Gott read opeem of her own com-position. The other program is at one ofclock Sundays, when Miss Amanda Cromwell presents a sacred concert with her rich tyric soprano. By the way, it is her rich lyric soprano. By the way, it is nice to hear the Digby Male Quartette, local talent, back on the program again, this time at 1:15 p.m. on Sunday. - Whew! What a winter the streets

avoid. But if people had regular eye examinations like they do with their tech, the incidence of blindness would decreases sharply. Also many people who should wear eye protection do not do should wear eye protection do not do so. Anybody who wears glasses should have their prescription made up in safety leave.

After 25 years, White Cane Week is not going stale. "As long as people fose their sight needlessly and as long as blind people have problems, the White Cane Week effort will continue", Because of CCB and CNIB blind people can do surprising things like skiing in winter and riding is summer.

On Sunday a quantity is reported to have come ashore near the range light at the mouth of Bear River. Other explosives have been found at Sandy Cove and Waterford.

Local scallop fishermen are expressing concern over the possibilities of their drags picking up cases of explosives.

Port Wade Man In Critical Condition Following Blast

... A'Royal Canadian Navy statement says the explosives are definitely not the naval property and ex-press the belief the cases had been improperty jettiaoned by a merchant ship or ships into the Fundy area.

On friday last, Lawrence Ellis, 18 year old lumber camp worker, is in critical condition in the Annapolis Royal Hospital after this body was badly shattered by an ex-plosion which followed the examination of one of the cases. A fellow worker, James Morrison, was rendered un-conscious, but not seriously injured.

On Saturday another man was seriously injured on the New Brunswick shore of the Bay while examining explosives washed up on the beach.

Ellis, who is a son of Mr. and Mrs. Loran Ellis, Port Wade, suffered the loss of his left leg, his left eye, and sustained severe lacerations along the left side of his body and face.

Christmas At Sea

The sheets were frozen hard, and they cut the naked hand; The decks were like a slide, where a seaman

But twas only with two pro-how ill we lay. We tumbled every hand on deak instanter, with

a shout, we gave her the maintopsil, and stood by to go about.

- All day we tacked between the South Head and the North; All day we hauled the frozen sheets, and got no further forth;
- All day as cold as charity, in bitter pain and
- For very life and nature we tacked from head to head.

We gave the South a wider benth, for there the tide-race toared;

noe-race toared; But every tack we made brought the North Heed close abroad; So's we saw the cliffs and houses, and the breakers'

So's we saw the clinis and house, and running high, And the coastguard in his garden, with his gleas against his eye.

The frost was on the village roofs as white as ocean foam; The good red fires were burning bright in every

The bells upon the church were rung with a mighty joviat cheer; For it's just that I should tell you how (of all days

in the year) This day of our adversity was blessed Christmas

And the house above the coastguard's was the house where I was born.

O well I saw the pleasant room, the pleasant faces

there, My mother's silver speciacles, my fahter's silver hair

And well I saw the firelight, like a flight of homely elves, Go dancing around the china plates that startd upon the shelves.

And well I knew the talk they had, the talk that

was of me. Of the shadow on the household and the son that

went to sea. And O the wicked fool I seemed, in every kind

of way, To be here and having frozen ropes on blessed Christmas Day.

They lit the high sea-light, and the dark begin

to fall; "All hands to loose topgallant sails", I heard the

captain call. "By the Lord, she'll never stand it," our first mate, Thurber cried.

... "It's the one way or the other, Mr. Thurber," he replied,

She staggered to her bearings, but the saits were new and good, And the ship smell up to windward, just as though

she understood, As the winter's day was ending, in the entry of

About This and That

Digby Board Of Trade worked on various Digby Board of Trade

Digby's Board of Trade got away to a fresh start on Tuesday, January 26, with a supper meeting at the Fundy Restaurant. By the time this editorial is read Digby Board of Trade will have had another meeting and committees will be appointed and business for the year will be planned.

Like in every town or village, the Uke in every town or villege, the Oftgøb Board of Trade struggles for ex-titence. Those things of not so weighty nature are frequently given preference of time by thred business men and a few feilthful are often left to carry a big load for the benefit of many through the Board of Trade, it has ever been thus and our congretulations and administion go out to such people as the pretent pretident, Russell Sionehouse, and his small band of workers who keep the Board of Trade functioning, often under trying conditions. Though not outwardly foo active during the past year, the meettoo active during the past year, the mer ind at the Fundy Restaurant revealed that etly the Council and committees had

The Dig-by Courter is here to help as the wants are made known and as we see them outselves.

Still In The Minority Instead of our sympathies being aroured, the program on the non-medical use of drugs as shown on Week End Sun-day night left us a bit angry, digusted and uosympathetic. Not unsympathetic with the program but with drug users. Our sympathies instead turned to the manifer of "kids" who are still responsible for hemistives and are not on drugs. We began most decided to in feel are non-

the drog users are still in the minority. Boredom? Every generation has had it and found a way round it. Every gen-eration has found the society of its day not to its liking. They set out to improve it. Non-medical use of drugs can't change society for the better or rid the day of boredom for too jong. Neither will flou-ing the law of society make a better place in which to live. Rather it is a direct contradiction to the society which yourh of roday would claim to seek. Boredom? Simply because a young person doesn't like Scoot, or the library

person doesn't like Scouts, or the librar parson doesn't like Scouts, or the library or sports or "you name it" doesn't mean they shouldn't disciptine themselves to them. There must be something, that a dist and sit staring into space. As Hon. Mr. Munor suggested, what about "helping thy neighbour?" Amy young people have skills they can use at vari-ous tasks. While they are lending a help-ing hand even without remuneration they Hon. Mr. Munro suggested, what about "helping thy neighbour"? Bakeny young people have skills they can use at vari-ling hand even without remuneration they are getting tild of boredom and saving the price of the drug which is supposed to be used for that very purpose. We are not conderming youth but we cannot on condemning youth but we cannot condone their excuse of boredom. That is entirely of their own making.

Getting to our own town municipality, the municipal council voted \$100 to asside 3 Youh Centre, The town people have also been asked to lend support. If it is to get some "kids" off drous and fill the vacuum, it is worthwith. If is to uphold and coddle youth in an unnecessary habit, it is money wasted. We admite the municipal and town failhers who insits on an accounting and an overseeing when money is hand-ed out even in small amounts like \$100. A principle must be guarded as well as one way to protect their future whether they realized in on to. It won't take too voted \$100 to assist a Youth Centre. The they realize it or not. The most common drug used by the youth is marijuana. Young people try to impress other young people and their elders that this drug is madically safe. elders that this drug is medically safe. This is not supported by scientific eu-dence. THIS STRANGE PLANET

Compared to outer space our world is little indeed, Yet, for one to set out and make his way to far places on earth takes considerable time and effort. After 50 hours on jets, and some 24,000 milles with some backtracking, we made the long circle last summer in just 34 days.

Going around the world is an experience in es-durance, even under ideal conditions. Five-star hotek, al-conditioning, and hordes of fine hospitable pope-bent of making tourists confortable, holped to lossen file shock of the main problems. Some of these view language barriers, strangeness of food, overhead weaker, time, zone changes, physical uppets, and a depressing cuest feature.

out quickly.

In a quick trip, major jumps are made overnight, and the new day brings more baffling currency, more world ways to do things, new earling challengas, the sp-gressiveness of more botterous taxi-eab drivers, and still more languages which leave you wondering. Often your cycs are seeing things which your mind cannot balieve.

This is an experience for anyone, especially for he Christian. After all, the Bible tells us that "God so loved he world . . ." It is good to know something about His world. I think we love and understand it a little better, fter the long and sensational jaunt of 1970.

Digby over the weekend. Would we dare to be so mercenary as to point un how effective this ex-change of visits can be for the tourism dellary We'll leave it only as a hint for we don't particularly want to contamin-ate a pure, genuine friendship with the over of dollars and conts. Nevertheless, any friendly tourists resulting from the second second by both Snonham, Mass, and Digby, we are sure. Our last issue had a headline wel-tione to the Stoneham, Mass, hookay forme to the Boneham, Mass, hookay forme to the Boneham, Mass, hookay for the Digby Minor Hocky League for making such occasions for friandliness possible. We are looking forwaite the 1972 with great anticipation and mark the 1971 with great anticipation and mark the 1971 with at a fine looking forwaite the 1972 with great anticipation and mark the 1971 with at a fine looking forwaite the other henefits accrued from such fine associa-tions.

Neither Stoneham, Mass, nor Digby, Nove Scofia, are largely populated vreas but brotherhood can be just as intense and manifest in small places and with little people as it can with big cities and with men of great magnitude and high attrions. we wonder how many of Bear River's long-time residents, when reading this week of the "divided" town of Bridgewater, recalled this occasion of 50 years ago: relevany 4, 1921 --

By the time line Courier reaches its readers this week, we except our new steel bridge to be open for reffic, which event will be haited with delight by Baer River and surrounding country. As will be remembered on the night of March 13h, 1920, the bridge them spanning our river and both piers on which it rested were carried away by the great frashet, and between the two parts of the town a "Great guilf fixed" nearly be hundred feet wide. How-ser our resourceful citizens in lasts than forty-eight hours had a suspension bridge in working order which carried foot passengers for tome weeks and the work of building concete piers commenced as soon as weather conditions, would permit. As it was found inpossible to plase an order with any Seel Company for early delivery of a bridge signibile for our needs a wood no was thrown across the river as a make shift for the summer. Much sooner then we had gured hopse when be had placed on splendid By the time the Courier reaches its readers this week this we had dared hope we have had placed on splendid concrete piers what is said to be the best bridge of its kind in the province which being a "thing of bisuty" we expect to be a joy forever.

Also elected by acatamation were vice-president Milly Winfield, Grade XII (Academic) Councillor, Shirley Hamilton, and Grade X Councillor Richard Baxter.

The polling, which was held on Tuesday, resulted the election of Helen May as secretary-treasurer, Marie enhault as Councillor for Grade XII (Commercial) and Wille Raymond as Councillor for Grade XI.

The new Student Council — which replaces the logist and Girls' clubs — will have full charge of all extra-sumworks activities of the Academy, including debating, styletics, dramatics, etc. The faculty will set merely in an stylicitry sepecity in these activities.

Keen interest was shown by the students in the election proceedings which were based on those of a civi-gerion, and ele successful cardiottates were elected with wide majorities. Community Efforts Bring Advancement

R. R. Baldwin, Supervisor of Schools, Weymouth in Civic and Community Leaders Committee Newsletter.

Have you hered the sound of guns, the breeking of glass, the roar of flames, the gound of terrified voices screaming for theip or yelling vio names in anger or must hysteria – all accompanied with the shrill shrieks of simes? Perchaps not. Yer, there are those that would and have Yet, there are those that would and have tried to resolve life's social and economic problems with these methods. Thanks to the good judgment, the love of man and peoplets for a better way of life it ap-pears that we are destined for a brighter future than this in our area.

Think back over the past couple of years and remember the advances that have taken place. Individuels and com-mituiliges have shown progress. How have these things taken place? Will progress commune?

Community leaders, political leaders, educators, social development workers and others have been united for a com-mon cause. IMPROVEMENT. The needs of more cause. IMPROVEMENT. The needs of periods and communities have been freely voted and a better understanding of the needs created. Unes of communication have been established through the print-dobleting. Feedings of pruval respect and cooperation have resulted from open voted and considered. The total of these sepresafts. Loss and thinking have been voted and considered. The total of these sepresafts to problem solving can be expressed in one word — MRROVENENT. Will this proofers solving with the sepresafts. Loss proofers solving with the sepressed in one word — MRROVENENT.

Will this progress continue with aven more fruitful results? Yes, but only with the combined concentrated work of with the combined concentrated work of will, Berch of us will be required to con-tinue in our efforts and yeak ways and metins to get results. We must not be-come simpatient or disheartened. The evolution of man, and society is a slow process, it can only be speeded up by a greater capacity to understand needs.

Oldsters Should Close The Generation Gap

The primary responsibility for closing the co munications gap between the generations "lies with the older, the ex-perienced generation," according to Douglas Gonder, vice-president of Can-adian National's Great Lakes region and

Right now time will not permit further comment on a letter by V. G. Cardoze in this issue of The Digby Courier. This is a letter which should be given careful consideration in this day of many demands on time, energies and resources. Mr. Cardoza's letter is most explicit, anyway, so actually few words are needed at this point except to say that

Fiday is recognized as World Day of Prayer when a chain of prayers are offered through one complete day as people in each part of the world as-semble together and pray together. The theme this year is A New People For A New Age. As reports come in for the next edition of our newspaper we will learn how the various speakers expoun-ded on the theme.

Love

What is this thing that men call love, What fathomed depths have stirred their souls, With lightsome lips and idle praise; Or moved them in their ways?

Must it needs be a passing fancy, That cannot long endure . . . Or a depth that grips the human heart, And lives forever more?

Is it a strange and subtle thing, Compelling in its ways; That moves the impulse of the mind, With measured tread man's fleeting days?

Love is the noblest work of God, Sacred and Divine . . . A precious gift that's set apart, To cheer your heart and mine!

High School Students Should Learn Realities

What does industry look for in young prospective employees?

"It looks for people who can think In looks for people who can think logically and objectively, people who can reason and criticize constructively. The are the areas of greatest weakness in high school graduates," says Ian Mitchell, logically and obje Atlantic region manager of planning for Canadian National.

He told a Moncton meeting of the New Brunswick Teachers Association that New Brunswick leachers Association that students should be given an opportunity in the last years of school to test their knowledge in a way which more closely resembles the situations they will face in the business world.

from my children to go to a movie with them, remind me, please, that there, are more pleasant ways to spend a aturday after

They had been begging for a week to see this ar movie, which had been well advertised on tele. They had been begging for a week to see his, periodar movie, which had been well advertised on rela-vision. As a matter of fact, the Saturday before last we had intended to drop the children off at he theatre while we want on another of our chronic house hunking expedi-tions, but, when we got to the place where the movie wa playing, the line was so long the kids got discoursed. They came along with us, and spent what must have been borinng afternoon waiting in the car, under sentence of dire consequence should they set foot in the house we uere viewing

Anyway, Saturday came, and the kids still had not seen the picture. I agreed to drive them to the theatre, assuring them, as I did so, that there could not possibly be a line-up when the film had been showing for a week.

"Why don't you come with us?" the kids asked. "You traven't been to a movie with us for a long time. You'd like it."

And I, sucker that I am, said I thought it would e great fun.

My theory about there being no kine-up because picture had been showing so long dissolved when we to the theatre. The line went to the end of the block, around the corner. Dutifully, we went to the end,

The bright sun and blue sky proved deceptive. Waiting, especially with three children, was bitterly cold. I felt my feet and fingers numbing as the queue vacuud its slow way around the comer, and up to the door of the theatre

We were within twenty places from the front of the line when the man came out to inform us that the seats were all taken, and that they would sell no more fickets until the next performance, in two hours. the line

The dhildren, having watched the recommendation of the recommendation of the same movie was playing for million away. "Please take us," in another theatre a few miles away. "Please take begged.

I envisioned a psychological victory. There would be, I reasoned, a lime there as long as the one we were leaving. The drive would be pleasant, and, when tha children realized the long with in store, they would decide to go home. I would turn out to be the goad mother who had applied every aserue, and still not have to go to the moth. We want in. We we the m

Unfortunately, there were so few people in front of the second theeter that it looked a little suspicious. I went in and enquited. My assumption was confirmed. There-was no kineup because the theeting was full, and the people fixed been sent away. "You can buy your tickets now," the girl at the box office suggested, "and you'll-have them for the next show.

The idea did not really make sense. To do it would mean another long, cold wait, getting home two hours-later than we had intended, and a delayed supper. The children looked hopeful. I bought the tickets.

We walked once around the block, to kill time, then came back, and waited. And weited. And waited. It was cold. The faids wanted to go to the bathroom. And we waited: The line of ticket holders grew longer. Nobody waited in the line for people who did not have tickets

Finally, finally, the doors opened. We licket holders nged madly into the building, as if we were afraid neone would rob us of the seats for which we had lied so long. It was more than two hours since we

We sat down, all of us who had waited for an howr in more in the cold. And when we sat down, we took up fewer than half the seats.

We could have gone home, where it was warm, me back, and still have gotten into that crezy movie. -

THE BIDDS DETILON

My birds are back and eating me-out of house and home. At least a hundred grosbeaks, flocks of cow birds, starlings, two goldfinches, my two faithful chickadees, three tree sparrows, two purple finches and last but not loast one English sparrow. I hadn't seen one for six weeks. The cow birds have started their babbling brook

song. song. I must tell you a duck story. Some children brought me this duck but I was our at the tide so they took it to another bird lover who examined it and put it in a tub of water. It smelled strongly or ferrosene oil and seemed to have something in its throat. The throat was nobbed to loosen anything that might be caught. When I arrived to get it we found it had died. Our opinion is that it had swallowed oil and no foubt it was burning its throat and was the cause of death

It was rolled in a towel with head showing placed in a fruit basdet for me to

LIFE IS FREE

In this tell-it-like-it-is lend of agn, there is something which should be considered. This is an experience which happens to everyone, but which no one wants to tak about out loud. I am convicced that all people think of it with foreboding or with attisfaction, depending upon their kind of faith or tek of h. This is the event called dentifither finsity-of it is well known to us, and cause shudder.

Could we ask a personal question? Have you come to the place in your Spiritual life where you know for tain that if you were to die today you would go to Hear for ce

There was you were to use toosy you would go to Heaven Those who have faced up to the Cospel know the Heaven is free, but that we don't desave it, baccuse of personal sin. God is so merciful that the does not want to pushis arroyne, but the is so used that that He must purfish and Lesus came to pay the price of the evil in us. He was God in the form of isits, who did and by His blood has satis-fied God in the payment of our guilt by His sorifica. Through faith Ha Jacus stands and by His blood has satis-fied God in the payment of purguilt by His sorifica. Through faith Ha Jacus stands needs to litt the burden of guilt from asch of us, we come to the place of peets with God and deliverance from the power of the Devilt. This is out faith of the mind only, nor a temporary faith during emergencies, but faith of the heart toward Jesus our only savieur. Does this plan of excape from self and sin, make service to you?

If it does do you want to receive sternal life now? Christ paid for it, it is free to you by faith. It is faith not in our doing our best, but in admitting that Jesus paid our debr, and we go free. By this kind of faith we can be sure ven. Then to thank Him, we make Him Lord and of H re Him in love. This is God's answer to death.

About This and That

A Progressive Digby Health Step

The possibility that the Digby Gen-eral Hospital grounds may become the location of an extensive hospital and wel-fare services complex has been seen with the information that proposals are under discussion at high levels that could lead to the building of a new children's home and psychiatric wing on Digby hosnital premises

This expansion of present hospital and children's home facilities, added to the provision of the proposed home, for the aged and infirm, also scheduled for logation on the grounds of the hospital, could mean the development of a com-tex determed for the delivery of total plex designed for the delivery of tota hospital, medical and welfare services fot the area

Will 50 Years Write Finis?

To be or not to be after its 50th year is the question confronting the Digby Association of the Victorian Order of Nurses of Canada. The Board is faced Nurses of Canada. The Board is faced with a grave decision, yet, the responsi-bility is not necessarily that of the Board but it is a responsibility of the public in general. The Board voluntarity operates the service for the benefit of the people. The people support the cause. It is there-fore the with of the people which will in the final analysis make the decision. Silence gives consent in so many cases, often to later grief or reluctance, It is our est hope that the people will not be silent on this crucial matter,

Of course, this editorial is not meant Of course, this editorial is not meant in any way to sway the decision of the people. Times change and we must be prepared to change with the times. On the other hand, a thorough and scruiniz-ing assessment should be made of this 50 year institution in Digby before it is frown up in discourgement and the "weter missed after the well runs dry."

Proposes Not Legalize Marijuana

Because the proposals to legalize arijuana have so far not been qualified I must disagree with the idea that it be legalized for a number of reasons.

I don't want to see a situation whe istificana can be bought by any 8 or 10 istificana can be bought by any 8 or 10 istr old child as one would be able to uy candy, and full legalization carriès ith it that implication.

If manuane were legalized it would throw the subject completely to the juris-diction of the province and we easily could have ten different sets of rules and regulations, or no rules and regulations at all which would be worse. Legalization would also attract into

Canada for the purpose of growing, using and distributing all those undesirable elements from other countries who would want to make Canada a base for would want to make Canada a Date too legalized growing but illicit trade into other countries, and we have enough now with organized crime. galization means that youngsters

Continuation Of Quotes From W. M. Waller

In an address before the Halifax vanis Club, F. M. Waller, Provincial Scout Commissioner for Nova Scolia, had this to say, quote:

the grounds of the Digby General Hos-pital, leading to the development of a hospital, medical, welfare complex, might be placed under a combined board of directors who would have, through com-mittees, responsibility for the services available available

In this connection, it needs to be noted that the present offices of the Wel-fare Department, are located directly ad-jacent to the hospital grounds and the mental health centre is just across the street

Today, when much emphasis it being placed upon the reduction of duplication of administrative costs and on the amalgamation of governing bodies to reduce overlap and the up to reduce overlap and the unnecosary wastage of available manpower for board involvement, a combined board of di-rectors for the hospital, medical, welfare complex would seem an idea worthy of consideration.

We do not intend to elaborate pres ently on possibilities or potentials here. Already in the news columns are found comments and information from the an-nual meeting held on Tuesday. Our columns are open to comments which might give the board of Management something to work on if they so desire. There are presently 20 patients being served by the V.O.N. They must have some comment to make. Doctors know whether the survice applics to the 1970's. Board members, present and former, must know why they have and continue support such an organization.  Of course, we do a lot of our own advertising in Hodge Podge. Why shouldn't we? We're paying for it. Might even let someone else do the same for a price. Nobody misses reading Hodge Podge, you know.

— Boy, oh, boy) Did we ever gid u complianed for Hodge Podge the other day! A young twoyer in Digby County frankly confessed that he desarth read idoige Podge bossues he wants to keep an open mind.
