The large show tent will seat comfortably ,500 people. There is no ring, the entire performance being given on the green turf, and an interesting one it proved. The Ver-non Brothers did some very daring feats upon the trapeze and horizontal bar, and have no superiors as aerial artists. The Mondoza Sisters, on the double trapeze, did some first-class performing, and the contortionist was a marvel: The Wild Westexhibition with which the performance concluded was one of the most realistic over presented. For a twenty-five cent show it would be hard to beat that of L. W. Washburn's.

A Tory Journal Speaks Out confederation was agreed to upon an understanding that they should be allowed their separate schools and their own language. These conditions were consented to by the English speaking portion of the dominion, and they were pledged to carry them out. For mought they knew, the British crown would protect them in their rights. If the English speaking community of the dominion now go back on their bargain, and wipe out the French-Canadian sentiments that have

tied them to the crown, then Quebec can only look to its material interests, and as those interests would be greatly improved by annexation to the United States, there being no other sentiment to bind that province to the British crown, they can only go in favor of improvement of their material interests. Such refusals of rights of the French-Canadian people will eventually drive them to annexation.

Johnstone vs. McNeill.

This case was tried before the chief justice at the June sitting of the Supreme Court in Digby, and the decision of his Lordship has been recently filed, his finding being for the plain iff Johnstone, with damages and

costs. The plainfiff sued the defendant for obstructing a way to which he claimed a right by immemorial user, he having travelled over the land of the defendant to Shelvin Cove for over forty years. The defense set up, was that the plaintiff used the way only before the opening of a public and by which access to She to the predical by which predicated by the p ous to the opening of which, the travelling over the land of the defendant was a necessity, and also that the defendant had en-52 joyed a similar privilege over the land of the plaintiff, which he considered as payment for the road used by the plaintiff on his

lands. In giving his decision, the chief justice held that the plaintiff, having had the uninterrupted use of the road obstructed by the defendant for over twenty years had carry on Dressmaking in all its departments, established a title thereto, notwithstanding also plain sewing. Of all the many Methodist clergyman we have known, there is none who, in our judgment, is so worthy ine coach, that for forty years saw regular service between Deadwood and Cheyenne. In its rough sides may still be seen the holes

The Budget then charges the rev. gentleman with improper social relations with the gentler members of his congregations,

and even goes so far as to say Mr. Crisp has confessed his guilt. Mr. Currie, it will be remembered, was once a minister of the Methodist Church himself, but through difficulties of a nature similar to those charged against Mr. Crisp was compelled to abaudon preaching. The fact that Currie blames Mr. Crisp for his own trouble is probably at the bottom of the charge.

President Harrison, by authority of an act of Congress passed last month, has issued a proclamation levying a \$25,000,000 and is the wealthiest man in toll of twenty cents per ton on all freight passing through Sault Ste. Marie canal in transit to Canadian ports. This is the retaliatory measure on which so much has been conjectured lately. Its immediate effect first years business. on maritime trade cannot be disastrous, but the general trade of the have been condemned and ordered to be sold country must feel severely the imposition of so heavy a tax. But, whatever its material effect, the act in itself is to be regretted as a disturbance erick Smith and Mr. Dalziel are only 24. of the amicable relations hitherte existing between this country and her southern neighbor. The tension has lince. not been very pleasant of late, but, now that the first step is taken, it is impossible to foretell where it may end. One thing is certain, it is too late for our government to recede from its position with dignity. If concessions were to be made, they should have been proposed before the blow the Canadians in the end to suffer majority. the canal tolls till their own waterway rendering them independent of their rival is constructed, than to sub-20 runa mit to dictation in the beginning. THE MINISTRY SATISFIES HIH.

Gladstone Had to Make a Few Sacrifices, However.

Not to Blame for Throwing Over Labourhere-Lord Abordeen Preferred Going to Canada to Going into the Ministry.

LUNPON, Aug. 21.—The six years rule of a Tory government in the United Kingdom came to an end and a Liberal administration succeeded it last week with less cere-mony than attends a change in the control of an American town council

The grand old man's task of cabinet necking is over, and to-day he returned to Hawarden to rest and think over his home rule bill, which will be drafted in time for the known as Moyle's field, and all the chief November session. On the whole, he is sat-sports of the world, such as bicycling,

inclined to accept India or the colonies, but on this Mr. Gladstone was firm, and all the liberal leaders coinsided with him. There was only one man for Ireland, and that was John Morley.

Lord Aterlieen might have had office, but he prefers going to Citada when the racaper arises, and some feminine quarrels have pre-vented Lord Brassey taking office.

HENRY LABOUCHERE'S ABSENCE

PROINERTION, - A Norwegian missionary who had been in India told us a very interesting fact. He said he went among the Sauthals, a tribe consisting of about one million people; fine tellows in many way, but most notorious drunkards. They used to start drinking regularly at two o'elcek, and go on till-nightfall They, of course, got drunk, and like Christians, beat their wives and so on. He told us he went to the Government of India and said : "If these people ask to have drinkshops done away with, will you allow them to be done away accordingly ?"-and the Government said yes. He got them to send up a petition, asking that the drinkshops might be abolished; and this was done, and now, instead of being the most drunken. people, they are one of the most sober people in all India. Why do I tell you that story? Because the argument continually brought

The New York Ob erver reports Joseph Cook as saying . "Protes and denominations are spending \$7,500. .900 a year for missions a sum which would not pay the liquor bill of the United States for three days."

Dr. George F. Pentecost says: "The average contribution of all Christian people in the United States to all forms of Christian benevolence is just thirty two cents apiece. The average contribution of the people of the United States for all kinds of liquor is just \$15 apiece." That means where \$1 is given for the Lord's work, about \$47 are given for the devil's work. Sin is just forty seven times more popular than Trighteonsness.

It should be remembered that the World's W. U. T. U. holds its second convention in Chicago in the first week of June, 1893, and is immediately preceeded by the World's Congress of Women, commencing May 15, 1893. These dates are fixed with special reference to the fact that the temperance women of the world would be here the first shoulders : no stays, or stays worn prietors are highly gratified at the letters week in Juné, and would wish to so loosely that each breath taken which come entirely unsolicited from men participate in the Congress, also that the women of the Congress canvas or duck ties. wish to be present at our great convention .- Union Signal.

Weekly Courier.

Digby September 16, 1892.

A COURIER BIRTHDAY.

the first volume of the nineteenth of intercourse with foreign countries year of a checkered and not altogetherunimportant career. The history of this paper is too well known to its readers to need further review now. Newspapers, like individuals, are more concerned for the future than the past. So, while the progress of the COURIER has been, ever since its first bow to the public, a sure and steady one, we still take more pleasure in contemplating what is yet before it in the way of possible achievement than what it has left behind.

For the hope on this matter which we are optimistic enough to hold; we cannot be said to have little ground, of return. nor for the gratification which that hope yields ought we to suffer much blame. For, efficient as the COURTER'S previous management may have been, we surely can be forgiven a little natural pride on witnessing the influence which its devoted though imperiect. treatment of public affairs has lately exercised on the public mind of the large community that came within compass of its voice. Not simply because the COURTER found this a Conservative county and won in the struggle to redeem it, nor yet because when opposed by influences, some powerful and some weak, it witnessed in the next struggle its majority multiplied fourfold, that we feel this pardonable pride ; but that in the discussion that attended these contests the farming and fishing classes of this county fully appreciated the efforts made by holiday. the COURIER to expose the fallacy of a policy to which they had previously

committed themselves, and the verdict on which we believed they would reverse, once they understood its real import. We cannot conceal a satisfaction almost amounting to pride in the fact that, in the realm of politics, where important reversals are more the exception than the rule, a change of feeling coincident with the COURIER's efforts should be so emphatically pronounced as was that during the last election in this county.

The COURIER in entering its nine teenth year-can only say to its readers that, in the future, as in the past, no pains will be spared to supply its pa trons with the latest and most interesting news from home and abroad;

Take fyer's Sarsaparilla and Ayer's only, if you need a blood-purifier and would be benefited permanently. This medicine, for nearly fifty years, has enjoyed a reputation, and made a record for cures, that has never been equalled by other preparations. AYER'S Sarsaparilla eradicates the taint of hereditary scrofula and other blood diseases from the system, and it has, deservedly, the confidence of the people.

Sarsabarilla

"I cannot forbear to express my joy at the relief I have obtained from the use of AYER'S Sarsaparilla. I was Afflicted with kidney troubles for about six months, suffering greatly with pains in the small of my back. In addition to this, my body was covered with pimply eruptions. The remedies prescribed inded to help me. I then began to take AYER'S Sarsaparilla, and, in a short time, the pains ceased and the pimples disappeared. I advise every young man or woman, in case of sickness resulting from impure blood, no matter how long standing the case may be, to take AYER'S Sarsaparilla."—H. L. BANKRUPT LAW WANTED.

How Creditors Aro Victimized by Conscienceless Traders.

[Montreal Trade Bulletin.] It becomes more apparent overy day that some radical alterations are needed in our bankruptcy laws, as under those at present existing, creditors are placed at a serious disadvantage, and trade continues to suffer in consequence. CHAMBERS OF COMMERCE.

The Trade Prospects Discussed at the Annual Meeting-Free Trade Favored Between the Colonies and Great Britain

LONDON, Sept. 20 .- At the annual méetng of the chambers of commerce, today, at Newport, Sir Albert Kaye Rollit, president | the Majestic of associated chambers of commerce of the United Kingdom, said he was not able to congratulate the country upon trade prosdull, textile industries were harassed by the tariff and perplexed by the economic momentary labor problems. Sheffield, Bradford and other centres, he said complained of the destruction of old branches of business by

the tariff. Shipbuilding had little more than remembrances. Shipping at the present was suffering from the effects of the cholera epidemic as well as from general depression. In business official returns, Sir Albert added showed little likelihood of betterment in the present conditions. The volume of England's trade was declining, though value of her imports during the year increased £3,-250,000 against the corresponding eight

months of 1891. This was caused by great

Take Aver's Sarsaparilla and Ayer's only, if you need a blood-purifier and would be benefited permanently. This medicine, for nearly fifty years, has enjoyed a reputation, and made a record for cures, that has never been equalled by other preparations. AYER'S Sarsaparilla eradicates the taint of hereditary scrofula and other blood diseases from the system, and it has, deservedly, the confidence of the people.

"I cannot forbear to express my joy at the relief I have obtained from the use of AYER'S Sarsaparilla. I was afflicted with kidney troubles for about six months, suffering greatly with pains in the small of my back. In addition to this, my body was covered with pimply eruptions. The remedies prescribe failed to help me. I then began to take AYER'S Sarsaparilla, and, in a short time, the pains ceased and the pimples disappeared. I advise every young man or woman, in case of sickness resulting from impure blood, no matter how long standing the case may be, to take AYER'S Sarsaparilla."—H. L.
